WEAPON LEVEL UP TIP
If you're into upgrading your weapons and creating Synth Spheres, here's a helpful tip that lets you quickly raise low-level weapons to Level 5 so that you can Limit Break them in a sphere. The problem is of course that fighting tougher enemies with a low-level weapon not only requires you to repair it frequently, but it also takes a long time to defeat the enemy. But why fight with the lower level weapon? Simply pick your most powerful weapon, and quickly defeat the enemy. Now, before the slain enemy vanishes, switch to the weapon you want to upgrade. Since there is a small delay before the WHP for the defeated enemy is added, you can easily build up lesser weapons that aren't suited for the enemies you're fighting — so that you can turn them into spheres and add

their powers to your favorite weapon.

ETERNAL RING

THE SECRET DUNGEON

There is in the game a hidden dungeon divided into four Floors. To access this area, you have to possess a Dark or Light Magic Spell Ring. Then go to the beach where you start the game, go to the left and you'll find a door that is locked. Cast a Dark or Light Spell on the door, and it will open. Inside this dungeon, you'll find really tough monsters. Most of them will be able to kill you in one hit, so be very careful. Here are the reasons why you must visit this dungeon:
- You'll get Level 5 Magical Stones of all kind.
- You'll find Magic Rings (in the 3rd floor, there is a bird that give them infinitely).
- You'll find Special Rings (including the Mirage Edge, that makes you hit 4 times instead of one).
- You'll find the Eternal Sword (you have to kill a monster in the last floor to get it).
- You'll gain tons of XP (big birds in 2nd floor are the best). - You'll be able to become almost invulnerable (see below).

To become invulnerable (any attack will have almost no effect on you), here is the trick. On the 4th floor, there are white crabs. Almost each time you kill them, they'll drop a Dragon Fang that will raise your stats (resist fire, resist ice...) by one. All you have to do is to kill all these crabs (using the Mirage Edge and the Eternal Sword is the easiest way). Then use all the Dragon's Fang, go to the 3rd floor and back to the 4th, and all the crabs are back... Keep doing that until all your stats reach 255, and you won't fear any monster.

SHOW ME THE MONEY
First of all you need two PS2 memory cards. Plug both cards in and start a championship on each card. Then copy one of your saved games from one card to the other. Now you have those two cars and a trunk load of cash!

EXTRA HP
Before you drive a car for the first time, if you change the oil your HP will increase around 10HP

Note: This varies for every car.

TIP: PULL A WHEELIE
Win the Rally series to get an Escudo Pikes Peak or buy the Corvette C5R.Buy the Highest NA tune stage or turbo. Go to test track on run and settings. Set the springrate and ride height to the lowest level, change the auto gear ratio to the highest level then the last gear to about 3.000. Then change the front downforce to the lowest level and the rear down force to the highest. Lastly, change the TCM and ACM to the lowest level. Go to the test track and when you reach 250mph your car will start taking off.

TUNING
Simply boosting your BHP to insane levels isn't going to guarantee that you get a race-winning car. Dont overlook suspension and gears.

1. Buy Race Transmission. If BHP→500 have the auto gear setting set wide, (3/4 on the scale)

2a. Buy Race Suspension. Increase spring rate (to ~1/2 on the scale). This allows you to lower the Ride Height (lower centre of grav = cornering stability)

2b. Add Camber Angle, 3 deg on front, 2 on back. This improves grip, but durability may suffer.

3. Cars that are still unstable can be "tamed" by increasing Down Force.

GOOD STARTING CAR
A great beginning car is the Sprinter GT Tureno. It's cheap and you can soup it up really easily.

RALLY SERIES
Go through some of the early races in the beginner league until you get a half-decent car (basically one with a good top speed that can compete at the super speedway circuit). Go and do the super speedway endurance race and don't bother pitting. You should win a pretty decent car - hopefully a Tickford Falcon. Now go and enter the final couple of rally races (the ones that are on the special circuit 5). The Tickford should win it easily and you get some nice rally cars for your trouble. The best of these is the Impreza Prototype. Now go and win the rally series. You should only really have any trouble with the maze circuit. When you win you get given a brand-spanking new Escudo Pike's Peak Version with all the trimmings... a whole lot cheaper and easier than buying the thing and doing it up. With a turbo on this baby, you can win any race at the test course.

TRICK FOR GETTING TO SHORESIDE VALE
If you want to explore Shoreside Vale before doing all the missions on Staunton Island then this is the trick you want. It's quite a hard one to pull off but gives you a great sense of achievement. First of all get a speed boat from the harbour and drive it up to the barrier that is blocking you from Shoreside Vale. Then turn and drive at the shore of Staunton Island. If you go fast enough you will land on the shore. once there steal a car and begin pushing the boat past the barrier in the sea. Once past the barrier push the boat back into the water. If done correctly you will land on the other side of the barrier. Once the boat is in the water get out of the vehicle and jump into the boat and sail away to Shoreside Vale. When you are there you cant actually do any missions. But one thing you can do is steal a Dodo (plane). When you have that you can fly over the gap in the bridge back to Staunton and save the Dodo in your garage so that you can get back to Shoreside whenever you want.

FREE GUNS
Take a wrecked car to your hideout and before you take it into the garage, pick up the weapons you have earned whilst collecting the hidden packages, (for every 10 packages, you get a weapon delivered to your hideout). Then park the car in the garage to fix it. When you drive it out the weapons should be there again and you didn't even have to

wait! You can do this again and again but make sure you car is wrecked first!

Keep throwing to WR2 and you should get a lot of touchdowns. It is possible to get a score over 33,000 with this trick.

BETTER CATCHES

To do a better catch than the normal one, where the player throws his hands in the air at the last second and most of the time misses, simply press Catch a second or a half a second before you reach the target of the ball, or before the ball reaches the receiver. The player will do a better looking and more effective catch, such a one handed catch, a jump catch, a spin catch, an over the shoulder catch (good for lobs), or a better diving one if the ball is out of reach.

To activate the telescope you must first destroy the BottRock Generator, and the panel on the ledge above the telescope. Now shoot the telescope lens to move it into a position where you can look through it to see crack animator Russ Rice on the Bioware balcony having a puff with some Conehead visitors.

MDK 2 DEVELOPMENT TEAM ARE STARS

While playing through level 4 dont forget to take a moment to gaze at the stars in the large arena with the three Poopsy Generators. Be sure to kill all of the enemies in this room first so you can star gaze without getting killed. Now, using Kurt Hectics sniper scope, zoom in on certain special stars in the sky (they are usually slightly pinkish in color). There you will find the crack team that made MDK2 possible gazing back down at you, along with their Wu-Tang Clan names.

MATRIX CAMERA MODE

While the game is paused press L1 and R1. This code removes the Pause Menu, giving you an unobstructed view of the spinning Matrix Camera Mode while the game is paused.

THE HIDDEN CASTLE IN THE SKY

In level 7as you are coming out of the tunnel toward the platform with the boss fight you will see two antennas which Kurt can jump up on. This can be difficult, but keep trying. Now turn around and face the tunnel that you came out of and jump to the roof of the tunnel. Now turn to your left and start shooting low at the sky with your Chaingun. You should eventually see your shots hitting something. It is an invisible walkway. Jump down on to it and keep shooting. Keep following the path of ricochet particles until you reach a little yellow square. It is a fan that will take you up to the next invisible walkway. Use your parachute and fly up. It takes quite a while to reach the top of the airflow, so be patient. Once you are at the top, rotate while firing your gun and look for the same ricochet effect and then fly towards it. Follow this the same as before and eventually you will come to the hidden castle. Take a look around the castle and you might discover something interesting.

Hide in the locker, so that you are inside the locker with the door shut. Press R1 to zoom in on the poster and Snake will make kissing sounds. Have Snake crouch if you want to kiss the lower half of the poster. Kiss by holding R1 down.

BONUS CARS

Look for red dots that appear on various levels. Place your car on the dot until a gurgling sound is heard to unlock a new car. Some of the dots can be found at the following locations:

London
Go near the center of the map. The dot is inside the Parliament building (block building with pillars on the outside). Drive through the window to get inside.
Find the reddish building with advertisements and an animated screen on it. Also, there is a box that almost looks like a padded cell in the middle of the street near it. Find the ramp leading up along the side of the building. Before you exit the ramp, you should be going approximately 30 to 45 mph (depending on the weight of your car). After hitting the roof immediately slam on the brakes. The dot should be to the right of you.
Find the strange turn near the Parliament building. Climb up a ramp, then jump to the left or the right, but do not fall off. Turn around to find the dot.
Once you start in London, make a 180 degree turn and head towards the blue blinking "Speed" sign. Go into the ramp at full speed. Go over on to the next roof and hit the brakes. Then, make a left turn and you will see the dot.

New York
Go near the park above the big tunnel. The dot is on top of a roof that you need to jump to reach.
Go near the aircraft carrier. The dot is inside the second story of a building that you need to jump to enter.

NBA LIVE 2001

CREATING A DREAM TEAM

In Season Mode of NBA Live 2001, it is difficult to trade for players when you don't have the talent to swap. And because Live only allows player-for-player trades, you may not want to deal your top talent to improve your squad. But there is a fairly simple way around this. To beat the system, go into Season mode, hit CIRCLE to bring up the menu bar and select Roster from the bar. From here, select Create Player. When creating a player, load him up with maximum stats and save him into the Free Agent pool. Then, return to the menu bar, select Roster and Sign the player you've just made. If his rating is over 90, you will be able to trade him for any player in the league (including Shaq and Allen Iverson). Repeat this process until you have all of the talent you want. Now go win that championship, cheater!

MAKE A SUPER STAR EVEN BETTER

At the Main Menu screen press ◎ to open the Active Menu. Select the Roster option. Then select Edit Player, A Super Star will load up if your Create a Player List is empty. You can make the players stats better (3 pointers, strength, dunking etc...) by hitting R2 at Edit Player screen. If u want a different player go back to the empty Create a Player List by pressing L2. Press Start and change someone else. Don't forget to save.

BREAK THE GLASS

Hang on the rim and press: L1, ⊗, R2, L1, ⊗, L2.

99 OVERALL CHEAT WITH ANYONE

To get 99 Overall Rating with any player, push ◎ to activate the menu, go to rosters, edit player and select your team and player. If you push R1 once, you will be able to put everything up at 99.

GET A NEW STADIUM

HINT: SECRET ROOMS

In the lobby, as you go up any ramp, blow a hole in the wall with a rocket launcher wherever there is writing on the wall. There will be a secret room in each writing spot. there are two flamethrowers, a rail driver, and a fusion rocket launcher. Also:

The lobby multiplayer level, you can reach the third level of the lobby (the roof) by blasting through the wall of the ramp. There is a rail-gun and fusion rocket launcher up there. You will know if it is the right side of the roof if you can see arches on the other side of the wall.

HINT: HIDDEN PIT

In the Deathmatch: Installation XJ5, you can get outside to the pit! here is what you do Grab the rocket launcher and jump down turn left see the archway? Blast a hole in the wall below the doorway and start building a tunnel straight to the open window. You might ask why do all this work when you can just go to the archway above and start blasting around the window? Well it doesn't work for some reason. Once you make the tunnel all the way through, you can look down into the pit below If you drop down, you will die! Turn to the left or right and blast a hole big enough to jump into (you make the hole on the outside of the wall). Jump into the hole and then make another hole straight in front of you but down a little way. Now that you have made another hole, jump into it. Make sure the hole isn't to far down or you will die from the fall. Repeat this process until you have reached the bottom of the pit. I must remind you that it is near enough impossible to get back up once you're down there.

Hint: Kill Bots Easily (Deathmatch) In any round that has a bridge, launch a few rockets at the floor to make a several holes. The Bots will run over it and either get stuck or fall through to an uncertain but unfortunate doom.

HINT: BOTTOM OF THE BADLANDS

Usually the only way you see the bottom of the Badlands level is when your falling towards it, but you can reach the bottom with your trusty rocket launcher. Simply blast a hole in a wall, then start blasting your way straight down, or if you prefer the safer way blast your vertical path from a distance. The best way to get down your "hole" is to face down and go backwards and when you start to fall go forward and you should land on the next level downwards. When you get there, make sure you notice the graveyard of bodies that have fallen from above, and remember, its quite impossible to get back up...

HINT: MORE GEO MOD COOLNESS

On the deathmatch level Badlands, you can destroy the whole upper bridge. Just destroy all three ends of the bridge with your rocket launcher, and make sure there are no pieces of the bridge connected to the wall, and you will get to see the entire upper level fall and break on the lower bridges.

HINT: TAKE NO PRISONERS

You can actually hold a Merc "hostage", sort of. Doing this is quite simple. There is a silver door opposite the Merc cafeteria in the Merc base. Go through this silver door and you'll find yourself in the Merc restroom and shower room. Behind you there is an unarmed Merc, wait for him to walk over to the sink, he will then turn around and stare at you. Pull out your Precision Rifle and shoot him ONCE in the foot. He will then run around for cover like the scientists and tech's do. He should eventually stop and crouch down covering his head. If you go staight up to him pointing your gun at him he will start to speak to you like scientists and techs do, saying things like, "I'm not gonna beg for my life!" and "Go ahead, kill me, I can take it!".

Now hold the L-Button and press up, right, right, B, left, B, A. Your tournament entry password will now appear at the top of the screen and you can write it down.

UNLOCK CHAMPIONSHIP MODE

Not to be confused with the standard Grand Prix Mode, Championship is a hidden option that lets you race a Time Attack challenge against a ghost car on the Synobazz track. The mode also offers the ability to see a replay of the winning run, complete with button commands display. To unlock it, register your name in the rankings of every race in every series.

EXPERT TECHNIQUE 1 ROCKET START

F-Zero's quick start is a bit different from most Nintendo racers so forget about trying to hit the A-Button when the lights turn green. To get the fastest start possible, hold down your accelerator prior to the start and rev the engine to the point where your fuselage(s) begin to light up. Now listen to the engine sound. You want it to be in the mid-range, not the high-pitched sound that occurs when you continue to hold down the accelerator. If the engine is in the mid-range when the race starts, you will get a fast start that propels you in front of the pack. If you rev the engine too high, you will also boost ahead but then lose power and slow down

for a few seconds.

EXPERT TECHNIQUE 2 BLAST TURN

Like the Rocket Start, the Blast Turn is another expert technique. To successfully maneuver tight corners without bumping into the guard rails, take your finger off the accelerator (A Button), then press it again to stabilize your racer. Combine this with the L and R drifting to get the best times.

EXPERT TECHNIQUE 3 PERFECT LANDING

Many of F-Zero's later tracks contain shortcuts that let you jump ahead of the pack by using jump plates. Be sure to look at the track layout in the lower left corner of your screen to see potential shortcuts. But knowing where they are isn't enough. You also need to know how to properly land without losing speed. If you just touch down on the track, your craft will bounce and you will slow down. You can avoid this by pressing down on the pad just prior to landing.

HIDDEN DEMO MODE

To see an explanation of the above expert techniques and watch the computer complete a perfect lap and show you when to brake and when to boost, simply press the Select Button at the title screen.

ERASE ALL DATA

If for some reason you would like to delete all your scores and saved game data, simply hold L and R while switching on your GBA. You will then be asked whether you would like to delete everything select Yes to execute the function.

RESET GAME

F-Zero has a built-in soft reset. If you want to reset the game without actually using the on/off button, simply press the following buttons at the same time: A, B, Select, Start.

SUBMITTED CODE

Go to the machine display screen in grand prix mode and press: L, R, Start, R, L, Select.

HARRY POTTER & THE PHILOSOPHER'S STONE

ALOHAMORA SPELL

Hermione teaches you this in the common room after Quiddich practice. It opens locked doors with pictures of stars on them.

FLIPENDO SPELL

Professor Quirrell teaches you this spell in your first lesson. It is a spell that shoots a ball of energy in a straight line. This spell can push objects, stun enemies or break containers.

FLYING SPELL

Allows you to move some stones and statues.

LUMOS SPELL

Lights the area for a few minutes.

TRANSFIGURATION SPELL

Taught in transfiguration lesson. Gets rid of object (files of books etc.) that are put over switches by turning them into birds.

DEFEATING TROLL

Get close, and when it raises its club, back off and hit it with the Flipendo spell. Then, knock it into the largest hole on the far left.

DEFEATING VOLDEMORT

After the challenges, you meet Quirrell in a room. He is actually the enemy. To defeat him, get him to destroy the four large pillars in the room. The best way is to stand behind them, wait until he shoots, then move behind the next one. When they are all gone, you both will fall into a room with lots of rocks on the floor and the mirror in the middle. He will walk to the top of the room and shoot at you. Use the mirror as a shield (it bounces his shots back at him). After awhile he will levitate rocks at you. Again, use the mirror as a shield. When he moves to the bottom of the room, keep the mirror between you. Shoot the mirror once with Flipendo and it will swing round and you can use it as a shield again. It will not be long before he is defeated.

TO GET ALL CARD DECKS

To get all the card decks from the beginning of the game, defeat Voldemort four times.

That key goes to a door that leads to an elevator. That elevator takes you to the roof where you fight the final boss. He is kind of hard, but is nothing you can't handle. Switch to first person veiw with the slingback shooter and fire away at the money until it runs to one of those little cracks. Then switch to the flash bomb and nail him. Run over to him fast and equip your net. Grab him and poof that's it. That's all you have to do. It may take a bit of practice but when you learn it it really helps.

BREATH OF FIRE 3

GENERAL

Do the Following in the faery realm: put 3 faeries in the casino. Talk to the 3rd one on the left. Now you can change the names of your allies (Garr, Nina, etc...) and the names of the faeries. Do the following during battle: combine the infinite gene and the failure gene. You will get a Kasier dragon that you could control. Make sure that Rei is in your party. Go to a place where you can fight a titan goo. Once you are fighting one make Rei Pilfer. You will get life shards. Keep doing this until you have as many as you want.

BEAT GAIST EASILY

Your confrontation with the sole living guardian besides Garr can be made simpler by getting rid of the two torches on either side of ryu. At first it seems that they just replenish 25HP to gaist, but in reality it also makes his fire-based attacks much more deadly. Note: For a really easy battle, have Ryu equip something like Magma Armour that absorbs Fire-based attacks.

BEAT THE DRAGON ZOMBIE EASILY

Battling with the Dragon Zombie after Ryu becomes older is almost always a tough battle because of it's poisoning abilities. To quickly destroy this monster have Ryu cast all his best heal spells on the Creature. This takes care of him in no time. This trick will work on any undead creatures, EXCEPT vampires. Note: Do not use items! Healing Herbs and Vitamins WILL give HP back to the Zombies.

BEAT THE DRAGON ZOMBIE EASILY, METHOD 2

When you get to the dragon zombie after you grow up just have Garr cast Kyrie on him and he'll die instantly.

CHANGE NAMES

In your Faerie Village, put 3 Faeries in a casino. Talk to the one on the left and she'll let you change the names of your party members, including those not with you, and other Faeries.

CONTROL THE KAISER FORM

When you choose the Kaiser, most of the time Ryu will be out of control. For better results, choose Infinity + Trance + Radiance as your ONLY genes.

DEIS

To get Deis go to Zublo Mountain AFTER you free her. All you have to do is go up the stairs when you enter Zublo Mountain, go up to the slab and press X. She will ask if you would like to be her apprentice. Note: you might have to go back there a few times because she will not apprentice RIGHT after you free her.

EASY EXPERIENCE

Later in the game, develop the fairy village until you have a copy shop, and copy a Ivory Dice until you have 12. Then use those dice in battle on a enemy (example: the Vulcans in Mt. Zublo). Depending on what enemy you use them on, you'll get 20,000 to 80,000 experience! Using the Ivory Dice in battle increases the amount of experience points you gain in battle. Using it once doubles the points gain, twice quadruples the points gain, and three times multiplies it by 8.

EASY GHOSTS

If you're having trouble beating the ghosts in McNeil Manor, use Heal on them. This even works on the boss.

FIND THE WYNDIAN KIDS

After Ryu matures, you can apprentice yourself to the kids in Wyndia that you played hide-in-

seek with before, but before you can apprentice to them you have to find them in a hide-in-seek game where you have to find them around the world.
Here's where to find them: Bais-in B3 of the Dauna Mine
Lang-behind a tombstone in the Wyndian cemetery
Lee-In the Eastern Wyndian Checkpoint, in a corner behind the guards
Wynn-in the lower level of Junk Town on the left side

FREE BERRIES
For free berries go to the coffee shop and kick the tree with apples in it for berries the berries give you 5 HPs back.

GET THE BEAST SPEAR
As soon as you beat Gaist, you need to search his ashes. You will then get the Beast Spear. This weapon will increase his attack by 150! The only drawback is that it will drain about 9 to 10 HP from him every round.

GET THE DING FROG FISHING LURE
To get the ding frog you have to be a "MASTER OF FISHING++". This is a lure that attracts everything but the guy only gives you 3. You can find him at the cliff just South of Steel Beach.

GET THE ROYAL SWORD AND THE LIFE ARMOUR
The way to get the Royal Sword and the Life Armor is to fish near Kombinat with the Deep Diver lure until you have 2 Whales, 4 Spearfish and 4 Barandy.(The Barandy fish is at the spot south of the Northern Checkpoint. You'll need a Frog lure for these fish.) After you have managed to get all the fish, return to Kombinat and use a Coin lure to reel in the big, fat thing swimming around. He will ask if you want to buy something. Say yes and the sword and armour is yours! Note that the Life Armour will let you regain a few HP every round.

THIEVING
While walking around towns and such you can steal a few zenny's here and there. Give the people a wack with your sword and they will pop out. Usually about 4 to 6 each time. This will even work on dogs and other animals.

WERETIGER NO PROBLEM
As you know when Rei rejoins your party he gains the awesome spell WERETIGER. The only problem is he some times attacks your party. Solution... In the begining of the game learn INFLUENCE from a BOSS GOBLIN (Pink Colored). Then after he rejoins have a slower character use it when he morphs.

EASY 18,000 POINTS
To get 18,000 points easily go to Big Air in Japan. Before you reach the three bridges

there will be a ramp which might look little. Jump of this ramp and gets lots of air and then hold in the up button. You then should be able to do a triple foward flip. Note: this tip might not work if you don't have enough air.

EXTENDED COMBOS

After you do all of your tricks and are landing do a nose slide. You will not be able to jump again but if you fall off of another cliff you can do more tricks for the same combo. I got a 130,000 point trick doing this.

PLAY AS BEAR

All you have to do is get to the bottom of the avalanche stage. You can also go on a little shortcut on the right around in the begining. It is harder so I wouldn't go in there.

PLAY AS CRUSTY THE SNOWMAN

To play as Crusty The Snowman, all you have to do is beat the Speacial track on Japan Mountain with 100 %.

PLAY AS MARS THE HARD WAY

To play as mars you must beat "Trick Master" mode on the Veteran setting. When this is done, Mars will be a playable character.

REPLAY CONTROLS

SHORTCUT THROUGH COLORADO

This is an easy way to get through Colorado. When you get to the part with patches of deeper snow, around the third or fourth patch, there should be a place with a lot of trees. Weave through those trees, and there should be a railroad track. Grind on that track and after a while, look at your position and you should be in first place. (Unless there is somebody is in front of you, which is most likely) I'm not promising that you will win every time, but it helps to break the time record.

SLOPE STYLE SECRET IN VERMONT

On the right side of the course, between the ramp with two rocks in front of it and the ramp with the green pole in front of it, there is a group of trees, you can grind on the fallen tree to reach the secret tunnel.

UNLOCK EXTRA MOUNTAIN

When you go to the tournament name enter in "newhill" and get an extra mountain.

UNLOCK ALL MOUNTAINS, AND CHARACTERS

Select One player mode and enter: ICHEAT as your name. If you entered it correctly will will hear a confirmation sound. This code will also give you more creation points for boards

COLORADO SHORTCUT

VERMONT SLOPE STYLE TUNNEL

On the right side of the course, between the ramp with two rocks in front of it and the ramp with the green pole in front of it, is a group of trees. Grind on the fallen tree to reach a secret tunnel.

EXTRA POINTS

ALTERNATE PATH PURPLE GEM

In level 9 Tomb Time, there is a way to access the Purple Gem path without having the Purple Gem! Towards the end of the level, the last creature you kill is the snake. After you kill the snake, turn left, and you can see a platform. Instead of going ahead, hitting the exclamation point and finishing the level, do a slide jump to that platform. If you jump perfectly you'll land. Do another one to the next platform. (HINT: It's a lot easier to do when you get the Double Jump power by defeating the 2nd boss, Dingo Dile. Then you can do a Double Slide Jump, and it's easy) But once you do the two slide jumps, you're at the end of the Purple Gem path! On the path there is a clear gem you can grab. And to get the gem for smashing all of the boxes, go through the Purple Gem path backwards, smash all of the boxes, then come back around the regular path, and grab a second clear gem at the end of the level!

APPLES FROM MONKEYS

When you are playing a level that has the rock throwing monkeys, after you have destroyed the vases that they occupy you can jump on the cowardly monkeys and get free apples.

AREA 51 TIP

When racing against the UFO's, you fall down holes. Just follow the wumpa fruit and it'll take you around the holes.

BONUS LEVELS (26-30)

To get to the Bonus Levels you must aquire 5 relics, which you get by beating the time trails. For each level you must have a certain number of relics to enter (increments of 5).

BOSS TIPS

Tiny

When Tiny dispatches the lions stay near the bottom of the screen to avoid them. Afterwards, dodge his trident attack and when it gets stuck in the ground counter with a spin-attack. Three spin-attacks defeat Tiny.

Dingodile

To beat Dingodile, stand back and avoid his laser attacks. As the frequency of his attacks begins to dwindle, run in spin-attack him and run out. Dingodile is defeated by three spin-attacks.

Dr. N Tropy

To defeat N Trophy, avoid his heat-seeking missiles and gun blasts. As he begins to tire, construct a staircase to his platform, run over and spin-attack him before running back. Three spin-attacks are enough to defeat Dr. N Tropy.

N Cortex

To defeat the final boss, Neo Cortex avoid the heat-seeking missiles and exploding mines that he tosses at you. After they explode, knock him into the sewer. Neo Cortex is defeated after three attacks. (Note: In the final showdown, Crash battles N Cortex while his friend, Aku Aku fights Uka Uka, Cortex's boss. Be careful and stay out of their way. The firepower from either side will kill you. Additionally, when Neo is knocked into the sewer, Uka Uka becomes more difficult for Aku Aku to defeat.)

CRASH DASH

Here's a tip, before you try to beat the levels in Time Trial, wait until you beat Cortex the first time, the super power he gives you is "Crash Dash" which enables you to run faster. This will help you get Gold Relics instead of Sapphire ones in the time trials

EASY MOTORCYCLE TIME TRIALS

On the levels where Crash rides the motorcycle, it's easier to beat the time trial if you wait about a minute before starting so that the other vehicles don't knock you off the road. Then, you can hit the clock and still proceed normally.

EXTRA LIFE ON SPHYNXONATOR LEVEL

Walk backwards as soon as you start this level. There will be 4 boxes and one of them has an extra life.

EXTRA LIVES IN DINO MIGHT

To get 5 extra lives, hold Circle and press X to jump. At the top of this jump, press X again to do a triple jump. Do this to get over the boxes and get 5 extra lives.

Find a parking meter over there. Press Triangle. Go to opening and follow the road and go underground. Take the road all the way to the end and turn right. Follow ramp to end then turn left then right then left again. Follow ramp till you see a mini car. Go to switch and hit triangle. A lift will drop and hop in car.

FIND A SECRET VEHICLE

First go to Chicago and go to the baseball field. Around there you will see a switch. Push it, then go in the stadium through the back. Get out your car and go up the stairs and turn right, then go straight. You will see a gold car with 2 black stripes on it. Get in and drive out and it will say something about you unlocking a car.

IMMUNITY

In Rio drive up to the curly side of the large lake and when you reach the cross-road at the top, on your left there should be a garage with barbed wire at the top. On the right of that garage there's a white building with black windows on the front. Facing the garage there's a number of black doors. Go to the one on the far right and press Triangle and you should unlock

'immunity'. If you exit and save settings you can load it up straight away.

MOUNTAIN PASS

In the big circular place that has the huge hole in the middle, it's on the westside of the screen. Go there and on the right side of the entrance is a switch. Hit it.

YELLOW CAR

When you see the map of Chicago, you can see in the upper corner a green square with some dark lines in it. When you go there you can see that it's a baseball stadium. When you ride around it you can see gates. At the opposite site of the gates there is a wall with 'Tickets' on it. Walk to the wall and push the triangle. The gate is open. When you ride in it you see on the left side you can walk up the crowd. When you are on top, go to the right, walk straight ahead, you're walking in a tunnel. After a while you can see a secret yellow car car. When you're in, ride to the left.

Go to Wrigley field and buy a ticket to open the gates. Then go to the ramp leading up and get out of your car. Run up and into the garage. Get in the yellow car and drive towards the closed gate: it will open and you will get the secret car.

JUMP OUT OF A CAR IN MIDAIR

Simply drive really fast up a ramp and press Triangle and Tanner will get out of the car. It will fly and land on the ground. You cannot jump out of the car in midair if the cops are on your tail.

CHASE THE GUNMAN IN RIO

This is a slightly longer way of completing this mission, but is more reliable than the shortcut. Get into the red car and accelerate (don't burn out). Try to hit the gunman along the way, but if you can't, don't worry. When you get to the winding mountain road keep as close to the gunman as possible. To do this, keep your speed as fast as possible without braking – just take your finger off the X button now and again.

Now, here's the main tip. Don't be tempted to follow the gunman's every move. He will frequently leave the road and drive and the mountain edge. However, if you do this, you are likely to fall into oblivion. Instead, stay to the road. You will be able to keep a constant speed, unlike the gunman, who will have to slow down greatly to avoid rocks and bumps.The gunman will therefore appear frequently right in front of you, allowing you to hit him from behind. Eventually, if you follow the road, the gunman will begin to slow down as the roadside obstacles become more hazardous. At this point, tailgate his car so that you are constantly hitting him, making his damage bar increase rapidly. When you get him in the red, you'll have the mission complete with seconds to spare. It's probably the toughest mission in the game, so stick with it. Practice will pay off and you'll be able to get on with your life.

RAINING CARS

When you don't have the cops on you go to a bridge. As it is rising, drive over but get out before you actually jump. Watch the car jump over, wait a minute and run over the bridge to see a shadow and wait another minute to see a car drop out the sky. Keep repeating this to make it rain cars.

FINAL FANTASY VII

CHOCOBO RACING
While racing the chocobos, hold L1 + L2 + R1 + R2 to increase your speed.

EASY MONEY
Go to the desert outside of the golden saucer and walk around for a while. Sooner or later a little cactus man will appear. You can't beat him with magic or weapons, but he can be defeated by summoning Chocobos or Mogs. If you manage to kill him he's worth 10,000 gil!

KNIGHTS OF THE ROUND TABLE
Ride the Golden Chocobo to the North-Eastern part of the map. There you'll find a hidden island with a cave. Enter the cave and talk to the red light to receive the 'Nights of the Round Table' spell.

ANCIENT FOREST
To get to the Ancient Forest before disc 3, simply ride up the hill with a black, gold or green chocobo.

BETA MATERIA
When you first go to the Chocobo ranch you have to catch a chocobo to avoid the Midgarsorm. Well, you *can* get the powerful Beta spell before the second disc. You need the Enemy skill materia, a Fire materia, and any elemental materia equipped on one person. Make sure the last two are on your armour. If you keep this character healed until Midgarsorm casts Beta you *should* be able to survive the spell. Then just finish him off. This is tricky to pull off but if done correctly you will be set for a long time.

CAST ANY SPELL THREE TIMES
To cast three magic spells in one round, first equip someone with a Magic Materia + 'All' Support Materia. You'll also need Barrier Materia with the Reflect spell learned. When you enter battle, cast Reflect on the entire party (your party). Then cast the magic spell that was connected to the 'All' Materia on your party. Even though you casted the spell once, it will be reflected and returned to the enemy hitting three times! And for the same price of the usual MPs. What's even better is that if you have W-Magic, you can cast that spell twice, or two different spells (both need to be connected to 'All' Materia) hitting for six times!!!

CURSE RING
While in Mideel (before it has been destroyed), go to the weapons shop and check the door in the back (the one that does not open.) Next, go to the shop on the hill with the man on the balcony. Walk behind him along the part of the balcony on the side of the shop until you here a rattling sound. Check the spot and you will get a key. Use the key on the door, and it will break off. The owner will ask what happened. Tell the truth and he will give you the curse ring. If you lie, he will not give it to you. It raises all of your stats, but puts the character on death sentance – but this can be countered with a Phoenix Down.

DEBUG MODE
(NB: this code requires a Gameshark.)
This code is by far the coolest thing you will ever see. First enter the code 8009A05C 0041 into your GameShark. Start up FF7 with the first disk. Choose 'New Game'. Instead of the normal opening CG movie you will appear in a room filled with Japanese symbols. IMPORTANT: Turn off your Gameshark after you are in the room. Walking onto these symbols will transport you to other rooms where you can go to at any point in the game, watch the CG movies, and gain a complete set of Materia among other things. You can also talk to the man in the bottom left corner to adjust other settings.

DEFEATING SAVIOUR SEPHIROTH
For this fight you will need: Knights of the Round, Zero Bahumut, and any other summons. Cure 3, Wall, 'Mime', DeBarrier, Remedies and at least three Megaexlir's. Start out by casting Wall on your party, then cast DeBarrier to take away Sephiroth's wall. After this has been done throw everything you've got at him. Use Mime to cause major damage. During the fight Sephiroth will levitate higher, signalling he's preparing to cast Super Nova.

If you are above 1500 energy you should be alright, watch out for his Heartless Angel – it won't kill you, but will bring your health down to 1. Then use Megaexlirs. Keep up the endurance and Sephiroth shouldn't be to hard to beat.

EASY AP

Go to the forest outside of Meedeel. Walk around until you fight Head Hunters or Caterpillars. Equip Cloud with an Apocalypse sword and everyone with a Rune Armlet. If you fight a group of 4 Head Hunters you get 340 AP. Caterpillars and a group of 3 Head Hunters give you 240 AP. Equip as many 'ALL' and 'MAGIC PLUS' materia a possible in the sword and Rune Armlet. When mastered they are worth 1.4 million gil each.

RIBBON

To get a ribbon you must go into the crater and walk around until you fight a Master Tonberry (a mole creature with a rotating yellow star above its head.) Attack him a few times and then morph him. He will turn into a Ribbon.

TETRA ELEMENTAL

There is a small desert island in the south under the Western Continent. Land there with the Highwind or with a gold chocobo. Walk on the sand until you fight a small cactus man. Morph him and he becomes a Tetra-Elemental. Yuffie seems usually to be the best morpher.

EASY LIFE

With this code, you can easily restore life while in battle without having to worry about anything happening. Enter a battle, and when your characters' health gets low, cast regenerate on him/her/them. Once the spell has been cast, open the PS lid and have someone cast a spell. For this trick to work, the lid on the PS MUST be open before you cast the second spell. With the lid open, the game won't be able to cast the spell, so the game will stop until you close the Playstation lid. Once it's closed, the game will function corectly and you can resume play. The trick to this code is that while the game is looking for the CD, the regenerate spell will still be working, so your life will fill up while nothing else happens! This code works great for some of the ultra-tough bosses (Emerald and Diamond Weapon) because nothing else will happen while the lid is up.

EASY MONEY

If you want virtually unlimited money, here is a wonderful trick. As soon as you have mastered an 'All' mateira, remove it and replace it with the new-born one and sell the old one. This may seem like kind of a harsh compromise, but each mastered 'All' is 1.4 million gils! And since they are so easy to master you will keep getting more and will never miss them. Sell one or two and you'll never run out of money ever again!

EFFORTLESS GP GAIN

To do this trick, you need a joystick controller with rapid-fire settings and access to the Gold Saucer. Go to Wonder Square, and up to the arm-wrestling game. Wrap a rubber-band around your joystick so that it's pulled to the upper left diagonal, so that Cloud continuously walks into the arm-wrestling machine but not into the GP-trading girl. Now turn on the rapid-fire for the 'O' button. Cloud will repeatedly challenge and beat the wrestling game. Slowly but surely, your GP will increase. It takes a while, so it's probably best to set this up just before you go to bed and leave it on while you sleep. By morning, you should have plenty of GP to buy your Gold Pass and the two secret Materia: XP-Plus and Gil-Plus. Cheater!

FAST MATERIA LEVEL-UPS

This cheat can only be done in the third disc. First, go to the northern cave and look for mole-like creatures with a star above their heads, also holding a knife and a lantern. Steal an elixir from them and then run away. After that, look for these small creatures in a floating pot. They will say "Gimme an elixir". Give them one. Then kill it. Each one killed will give you 1000 AP. You cannot kill them unless you give them an elixir.

GAIN LIMIT BREAKS EASILY

When in normal status use a 'Hyper'. This will let your limit meter go up faster, so you can use your old techniques more. The reason for this is that one way to get your limit breaks gained is to use your old techniques.
WARNING: When you use the 'Hyper', your status changes to 'Fury', which will lessen your hit rate.
Another way to gain your limit breaks is to defeat large groups of enemies. Try this: when leaving the Nibel Mountains and heading for Rocket Town, you should see a group of forests. Try engaging combat there, because sometimes you fight large groups of enemies, such as a group of six 'Battery Caps', or sometimes five 'Battery Caps' and one 'Valron'. This might help to get your limit techniques too.

HUGE MATERIA

To obtain the Huge Materia in Rocket Town, press Circle, Square, X, X as the passcode.
There are four huge Materia that can reproduce other materias if you can pass the requirements.
Blue: You must have Bahamut and Bahamut Neo. Take these to Cosmo Canyon and talk to the Blue Huge Materia and you will receive Bahamut Eishiki (Zero).
Yellow: Master the Steal, Throw, Mime, Manipulate, Morph, Deathblow and Sense Materias, then talk to the yellow huge Materia to receive the Master Command materia.
Red: Must have all 16 summoning materia at master level then talk to the red huge materia to receive the Master Summoning materia.
Green: Must have all 21 magic materia at master level then talk to the green huge materia and you will receive the Master Magic materia.

ITEM DUPLICATION

If you have the W-Item Materia, equip it and enter battle. Use the W-Item command and select your first item you want to use with the Circle button. Then choose your second item but do not use it. Select it so that cursors appear on the screen (either on you allies or your enemies), then cancel with the X button. Select again and make the cursor appear, then cancel. Repeat the selecting and cancelling of the second item over and over. Each time you do this the quantity of the first item will increase by one.

LIMIT BREAK MANUALS

To learn Level 4 limit breaks you'll need to find the manuals. Here's how to find them.
Cloud: Trade 32,000 battle points at the Golden Saucer.
Tifa: Go to Nibel area (Tifa's house) and play these piano notes: X, Square, Triangle, L1/R1 + Triangle, L1/R1 + Square, X, Square, Triangle, L1/R1 + X, O, X, Square, X. Then press START and search the music sheet to find Tifa's Limit break.
Barret: A lady will give it to you in North Coral.
Aeris: Southeast of Midgar there is a small cave with a man living there. Talk to him when you have battled a certain number of battles that end in the same number, such as 122, 133, 144. He will then give you a Mithril orb. Take the Mithril to the Blacksmith's house on the south peninsula near Cosmo Canyon. He will trade you for the limit break manual for the Mithril, or you can choose to have a gold bracelet.
Red XIII: In the Nibel area there is a mansion and on the second floor is a safe. To crack this code turn right 36, left 10, right 59, and right 97. The safe will open to reveal a miniboss. Kill the miniboss and you will recieve Red VIII's Manual.
Vincent: Land near the waterfall and use the green, black, gold chocobo or submarine to pass the mountain. Then enter the waterfall. (You must have Vincent in your group and it must be done first in disc 2.) Go forward and it will show Vincent's past. Then leave. Return if you are already in disc three and you'll get not only the manual but a weapon of Vincent.
Cid: Cid's manual is in one of the chests in the sunken plane.
Yuffie: Go to Wutai and enter the tower with Yuffie and let her beat all the bosses including her father and you'll get a manual and Leviathan materia.

LIMITED IMMORTALITY

Connect the Phoenix Summon and Final Attack materia in any linked slot. When your party dies, their Hitpoints will be completely restored. This makes killing Ruby, Emerald, and Sephiroth simple – just make sure you have enough Mindpoints to use the Phoenix Summon.
For more punch, add a Final Attack/Knight of the Round Table to the same weapon. Then when you die you'll resurrect and hit back HARD. NB: this method is limited because you can only use Phoenix materia 5 times.

MORPH ENEMIES EASILY

For an easy way to morph enemies, have W-Magic Materia, Gravity Materia + 'All' Materia, and Morph Materia. Have someone else cast Reflect on the party, then have the person with W-Magic use Demi 3 on your party twice. It will reflect and hit the enemy six times without killing it, but will greatly reduce its HP's. At this point, you can easily morph it.

PREVENT BACK ATTACKS

If your battle starts with a 'Back Attack', hold L1 and R1 for a moment then release them. This will turn you around before your opponents get a shot.

RACING TROPHY

When racing S-class in the Gold Saucer, you will notice many keen items you can't ever seem to get. Well, you can get them all at once! Just win 15-20 races in a row! Ester will say, "I've never seen anyone win so much in S-class before!". She will then give you one of each item, including the coveted Cat's Bell. This trick only works once.

RE-ENTER MIDGAR

It is possible to get back into Midgar after you have left (not including by parachute.) On disc 3, go back to Midgar and talk to the man standing outside the fence. He says he has misplaced his key and that it is probably back at the dig site he just left. To find the key, go to Bone Village and tell the foreman you want to look for Normal Treasure. Place some of the workers up top in front of the tent and set off the blast. They will point to a spot on the ground, so have them dig there overnight. In the morning open the treasure chest and you should have the Key to the Sector 5 Slums. Now go back to Midgar and go through the gate. Go back to Wall Market and go to the shop where the item machine was broken before (the one that shot at you), and try to use it now. You will recieve Tifa's ultimate weapon.

RECOVER MISSING ITEMS

Did you miss something important? Fear not. Once you get to disc 3 you can recover anything by excavating for it in the Bone Village.

RECRUIT VINCENT

In the Shinra mansion at Nibbhiem, there is a safe on the top floor. The combination is: Right to 36, Left to 10, Right to 59 then Right to 97. Make sure you don't go to far left or to far right when turning. When it opens kill the monster, then get the stuff in the safe. Descend the spiral staircase into the coffin room. Vincent is in one of the coffins. Talk to him and leave, then come back, talk to him and he will join you.

RECRUIT YUFFIE

Near the exploded Mako site there is a small forest. Wander around in it until you fight a ninja woman. After you defeat her there will be a save point. DO NOT USE THIS or she will run away. Talk to her and tell her you don't want to fight her again. Then tell her you're terrified

of her. When she asks if you need her help, say "Yes", then tell her that you're leaving and don't ask for her name. Alternatively, try this. Equip the Enemy Away Materia which can be won in the Gold Saucer Chocobo Racing and a Luck Plus Materia. Go into any forests and wait for a while. Note that the Enemy Away Materia must be at Master Level for a higher percentage of chances to encounter Yuffie.

RESET

Hold L1 + L2 + R1 + R2 + Select + Start to reset.

SPECIAL BATTLE

To get to the URA battle (special battle) in the Battle Arena, first gain 64,000 battle points and buy the W-Summon materia. Next get 32,000 battle points and buy Cloud's level 4 limit, Omnislash. Equip Omnislash and talk to the lady at the counter in the battle arena, and she will ask you if you want to participate in a special battle. Beat all 8 enemies and get the Final attack materia. NB: You must have your Ultimate Weapon equipped to fight in the special battle.

SPECIAL CINEMA

After Cloud rejoins your party in the second disk, visit the Shinra Mansions Basement again in Nimbelheim entering the library. There will be a sudden flashback to a special cinematic scene of how Cloud ended up with his friend Zack's sword.

TIME ATTACK CONTEST

At the Golden Saucers Wonder Square there's a snowboard game. If you get a good rating on the beginner, expert and crazy courses, next time you play there you will see a yellow balloon. Grab it to enter time attack mode. In this mode there are no balloons or obstacles and you go extremely fast.

UNLIMITED SOURCES

To get unlimited Sources (luck source, magic source, etc.) perform the following actions. Get in the submarine and go to the downed plane. Wander around until you get into a battle and use the morph command on the enemies. The best way to do this is to attack the enemies until they are almost dead and then use morph. In this area there are six different enemies and each one morphs into one of the six sources.

START GAME WITH W SUMMON (GAMESHARK)

8009D0C4-0014

BETA SPELL

Have an Enemy Skill Materia, Fire, and the summons. Fight the Midgar-Zolom and keep your people at their max. You should be able to withstand his 'BETA' attack. After the battle is over you should be able to cast the 'E-SKILL BETA'.

CHOCO/MOG

Go to the Chocobo Ranch and talk to a chocobo in the outside fence. Then you have a choice between 'WARK' or 'WARRK'. Choose 'WARK'. They will dance, and then they will give you your CHOCO/MOG materia.

RESURRECT AERIS

When Aeris dies press X, X, X, R1, X, R1, and Circle and she will come alive again.

FOURTH LIMIT BREAK FINAL HEAVEN

Tifa: fourth limit break final heaven in Tifa's house – press X, Square, Triangle, R1, Triangle, R1, Square, X, Square, Triangle, R1, Triangle, Circle, X and Triangle.

EXTRA X-POTIONS

Go to the island west of the map (Wutai Area) and fight a yellow monster which looks like a beetle with a brown tail. You will get an X-Potion for each one you defeat.

GET 9999 GB AT GOLD SAUCER (GAMESHARK)

8009D7DCC350

SUPER FAST POWER SOURCES

For this cheat you need 3 items, the Morph materia, the Sneak Attack materia and the Conformer. Equip Yuffie with the Conformer, the sneak attack and the morph materia (make sure the sneak attack and morph are linked). Go to Gongaga (the melted-down reactor) and fight heavy tanks. Yuffie will morph them for about 3000 damage, thus getting you a power source. Repeat this until you have 99 power sources.

DEFEATING DIAMOND WEAPON

It isn't really all that hard. Make sure you have plenty of echo screens and you have your best weapons avialable. Don't attack when the chest plate is closed, just use summons or magic. Attacking will only result in deleting 0HP. Use this time to cure your party. When the chest plate is open you will be given a 5 second countdown. This is when you attack and use your most powerful magic or summons. When the countdown is finished, the weapon will attack with DIAMOND BLAST, which reduces your party's HP to yellow alert mode AND COURSES SILENCE. Try to kill it quickly, and if you have phoenix (which you definitely should have by now) you should use it when you only have one character left – which should almost certainly happen.

DUPLICATE ITEMS

The ingredients for this code are the W-item materia and 2 of the item you want to duplicate. (The item must be an item that you can use in battle.) All you have to do is get in a battle, preferably a weak enemy. Then have the person with W-item equipped go to item. Highlight the item you want to duplicate then use it. Use the same item but first press X. If you did it right, then you should have one more of the item. Just keep pressing O, X, O, X, O and keep going until you get to 99. If you want to duplicate another item in the same battle then just push X when you are done with the first item, then do the whole process over again.

SUPER STRENGTH WITH SQUALL

Once your GFs learn STR+10%, 20%, etc. set it on squall. Then junction to his strength tornadoes if you have 100 of them. With the lion heart and a flash-using trigger you could probably do 9999 damage every hit, which would work well with his limit break, Renzokuken.

GET CACTUAR GF

First before you try to get Cactuar you should be around level 60 and have the Levithian GF. You have to go to Cactuar Island which is in the southeast corner of the Esthar continent. You can distinguish it because of the big green Catuar that keeps appearing and disappearing on the island, this is the Jumbo Cactuar that you have to battle. You should equip the Revive and Recover Abilities on two different people because the Jumbo Cactuar uses the 10,000 needles ability which can wipe out a character in a single shot. The third person should be able to cast Life or Full Life spells. Also the Jumbo Cactuar is weak against water so use Levithian. The Battle is all about patience because you have to keep reviving your characters and attacking at the same time plus the Jumbo Cactuar has 60,000 HP. Have one character act as a medic while the other two attack. After attacking the Jumbo Cactuar for a while a little sign will appear saying that the Jumbo Cactuar is hesitating. Stop all your attacks at this point because he may run away. Just use Levithian and your strongest attacks to finish him off before you! Stop. After you beat him, you get the Cactuar GF. This is one of the best GFs in the game. When it's at level 100 he can do 10,000 points of damage and you will never have to boost, ever!

TENTS DURING BATTLES

Tents during battles. You may use tents during a battle, though sometimes it will revive you another time you may be bitten by a blind/poison/silence snake.

TIPS

First get all coins (Stellazzio) and then you get Zidane to have to go to Memoria. Get the Hammer and the Save The Queen Sword and finish the game.

FINAL BOSS NECRON

At times this will be a nightmare, but others, it will be as easy as pie. Start off by casting Quina Quen's Mighty Guard. Then have either Eiko or Dagger (whoever's on your team) cast Regen on your entire party. Use Zidane to attack and Stiener to use his Stock break ability. If you have Amorant, then throw your most powerful weapons at the beast, Freyer: Jump or Dragons Crest or Vivi: his most powerful spells. Keep pummelling it and if you're VERY lucky it won't use its most powerful attack, Grand Cross, often. This move takes about 3500HP from all of your players but gives every bad status in the book. Becha ya didn' see dat comin'.

SOULCAGE (LIFA TREE) BATTLE TACTICS

Soulcage is a powerful enemy with 9765 HP/862 MP and no weakness. Equip everyone with Body Temp because he does Mustard Bomb which causes heat. Equip Auto-Potion and have Eiko's Auto-Regen ability. Use Carbuncle to cast reflect on the entire party or use Fenrir. Summon Phoenix to revive party members – also causes damage to Soulcage – and have Vivi cast Bio. Things to steal are Brigandine(hardest), Magician Cloak, and Oak Staff. He gives 9 AP after the battle.
Hint: If you want to kill him fast, cast life on him because he is undead, and this is a way to kill other undead monsters.

EASY WAY TO BEAT SOLCAGE

Have Eiko or Garnet (aka Dagger) Use life on Solcage. Keep on using it. Let other party members use their BEST attacks. (Dies faster when you use both Garnet and Eiko and let them cast life every round).

LISTEN TO OTHER FINAL FANTASY SONGS

On 4th disk. Get Une's Mirror and doga's Artifact from Treno's Auction Items. Go to Black Mage Village. Go in to the inn. Go next to the music thing and talk to the black mage and the girl and then press ⊗ on the music horn.

ULTIMA WEAPON

To find Zidane's ultimate weapon raise a chocobo so that it has the ocean ability and make sure you have dead pepper. After Shimmering Island is destroyed, take your chocobo to where the island used to be, use a dead pepper. Your chocobo will find the Ultima weapon, Invincible card, and the Maxmillian (armour). The Ultima Weapon has 100 attack points!

The easiest way to get the Concept Car is to get all gold medals on the B-Class licence tests. The original red Concept Car will appear in your garage. When you complete the UK vs. US race in first place under the Special Events menu, you normally will get an A spec Mazda RX7 LM. However, if you are lucky you may instead get a dark purple Dodge Concept Car with a greater horsepower of 560HP.

DUPLICATE RED CONCEPT CARS

Unlock a Chrysler Dodge red Copperhead Concept Car in your garage and save the game onto a memory card. Remove the memory card, start a new game and select 'Trade' from the Home menu. You will be prompted to have a card inserted into slot two. Do this, wait for the card to finish loading, and select the Concept Car from the garage. Normally it costs money to buy a car from this garage, but the Concept Car will cost $0. You will be asked if you would like another car. Answer "Yes" and select the Concept Car again. Repeat this to have a maximum of 100 Concept Cars. Note: The advanced, dark purple Concept Car will cost $35,000.

BEST BARGAIN WHEN SELLING

When selling a car, look around the different car dealerships to see where you can sell a car for the most money in return.
NB: The red Chrysler Dodge Concept Car cannot be sold to any manufacturer.

BIG MONEY

Buy a car (the Dodge Viper GTS recommended) and do not make any tuning adjustments to it. Then, enter the Normal Car (Commercial Cars) championship. There are five races each with five laps, and for every race you win you will receive $50,000. Additionally, if you manage to come first in the championship, you will receive $100,000. Altogether, that makes a total of $350,000.

DUPLICATE PARTS

Purchase two identical cars. They may be given different colour schemes if desired. Buy as many parts as desired for the first car. View the list of fitted parts of the first car from the garage. Switch to the second car, get inside, and view its fitted parts list, which should be empty. While remaining in the second car, enter a spot race. At the qualify options, select 'Machine Setting', then 'Change Parts'. All the parts from the first car should be available. Exit the race and return to the garage. View the list of fitted parts for both cars to see that all desired parts have been duplicated. NB: Only items available on the 'Change Parts' menu may be duplicated. This trick will not work on cars that have been awarded.

CONSERVE MEMORY CARD SLOTS

Play the game in arcade mode, exit, then enter simulation mode and save the game. By doing this, the arcade and simulation mode information is saved together, cutting the amount of memory card slots used by half.

MEMORY CARD BATTLE WITH ONE CARD

Enter memory card battle mode. A message will appear stating that player one is loading and that no memory card was found for player two. Wait until the information has loaded for player one, then remove the memory card and insert it into the second memory card slot. WINNING TACTICS

Win the 4WD Challenge at Laguna Seca to receive a 618HP custom car. Take that car to the Tuned-Turbo Challenge and enter the Test-Track race. You will win 50,000 credits and a car worth 30,000 credits for each 3-lap race that is won. The secret to winning on the Test-Track is in the corners. Stay smooth and off the walls/grass to pass the faster cars. Do not let them block your car, and drive defensively once in the lead. You will also need licences to race. Get a brand new Nissan Skyline GT-R Vspec (R34.J) '99 and tune it to the max. Then, get an International A licensee. Go to Special Events, then Line Up 4, choose Tuned Turbo Car No.1 Race at the Test Course. Finish in first place to get 50,000 credits and a Skyline that is worth 30,000 credits. Repeat this until you win a 250,000 Mine's HKS 180 SX (racing modified). Repeat again until you win a 13,750 Mines Lancer V (racing modified). Note: You do not have to use a Nissan Skyline, just a powerful and fast car. After wining all National races, race any of the Euro-Pacific races. Each win will give you 10,000 credits plus a 250,000 credit car. Buy a used Nissan Skyline GTS-t Type M(R32,J) '91. Completely outfit it with all performance and handling upgrades (excluding 'For Professionals Only' items). Enter 'Grand Touring Cup' and win first in Midfield Raceway (about 4 minutes). You will receive 30,000 credits plus a 250,000 credit Unisia Jecs Skyline. Sell the car. Repeat this process four times to earn about 1,120,000 credits in under 16 minutes. Race in any 'Muscle Car' race with a normal car. Since 'non' muscle cars have better acceleration, once you get ahead of the muscle cars, just watch your back, and do not let them pass. Go to the 'Muscle Car' event and enter the second race. Win this race to get a car worth 75,000 credits and 8000 prize credits. Race the 30 lap endurance race. Win first place, and get 150,000 credits and a Supra race car worth 250,000 credits. A recommended car is a '91 Supra Twin Turbo R outfitted with sports tires, sports brakes, sports suspension, chip upgrade, stage 1 turbo, racing intercooler, racing exhaust, and stage 2 weight reduction. NB: The race will take approximately 50 minutes to complete.
Go to the Gran Turismo All Star League and win the Laguna Seca race. You will receive 50,000 credits and the TVR Speed 12 which you can sell for 500,000 credits. Getting the GT One On-Road from Toyota and putting a stage 4 turbo on it is recommended. Race all of your licences until you get all gold and a FTO LM. Take it to the Gran Turismo All Stars. Race the Red Rock Valley twice and sell the car you win to end up with 1.1 million credits. Get a good car such as the Suzuki Escudo Rally and the I-A Licence. Go to the GT2 All Stars race under Special Events and win the third race to get a car worth 500,000 credits.
Start the game and buy a used car that is convertible. The drivetrain does not matter. Race the proper championship to make to quick money. If the car is fully upgraded and without racing modification, then go to Muscle Car Shootout. Win the second round of the Muscle Car Shootout to receive the Cobra that can be sold for 75,000 credits. Do this one more time to have about 150,000 credits. Now, fully upgrade your car. Once getting a fully mod convertible racing car, go to the Convertible Racing Championship and win the final round to receive the concept car (Copper Head). You do not have to race the first and second rounds. Do not sell the car. Race one more time to get another concept car. Sell one of concept cars for 125,000 credits, and change your car to the other concept car. Go to Dodge and upgrade the Concept car with TCS and ACS. Go to the Mid Engine Championship and set your car with lowest ride height, the anti-roll bar to 7 on both front and rear. And TCS and ACS to the middle (50 out of 100 and 25 out of 50). This will prevent spin out while you are on low speed tight turns and make this car one of the best racing machines. Win the final round of the Mid Engine Championship to receive the Ford GT40 Race car. Sell that car for the credits. Repeat this race until obtaining 1.5 million credits. Go to Toyota to buy the GT-One Road Car and upgrade it with stage 4 turbo , and other mods, including TCS and ACS (set to the middle). Unfortunately the car will not except the racing modification but car itself is excellent in street spec with any racing conditions.
Purchase any car and race it in the Trial Mountain Endurance race. After getting first place you will receive a Denso Sard Supra worth approximately 125,000 credits. Go to the Gran Turismo All-Stars and race Red Rock Valley. After winning you will receive 50,000 credits and the TVR speed 12 that is worth 500,000 credits.
Get the international A licence, then obtain a good, fast car. Go to special events and go to Gran Turismo All-Stars. Enter the Red Rock Valley Race. Finish in first place to receive 50,000 credits and the TVR speed 12. Sell that car to get 500,000 credits.
Win the 80s Sports Car race on Tahiti Road (last one) and to receive 10,000 credits and a car worth 125,000.
First, get a B-International licence. If you have a lot of money, go to 'East City', and get a 1990 Mazda Inffini III. Tune it up to 364HP without racing muffler, manual transmission changes, weight reduction, or racing mods, but get everything else including both of the 'for

professionals only'.
Make sure that you get for professionals only on the suspension. Go to the 394HP race on Tahiti Road in the 80s Challenge. Set the spring ratio to 4.5 both on front and rear.
Change dampening bound and rebound to 6. Change the stabilisers to 5. Lower the car height to the lowest possible. Set the brakes to 15. Change the ACCS to 50 and the TCS to 30.
After winning, you will get 10,000 credits and a 555HP Skyline R30 Sillotte Formula. If you want the car, race it with the same car and win it again. Go to your garage and sell the cars for 125,000 credits each.
Earn enough money for a '99 Ford Cougar. Tune it to 295hp, buy racing slicks, and tweak the drivetrain. Then, if you have completed your license tests, enter the Endurance Challenge section of the game and race in the 30 lap race. You will win 150,000 credits, plus a '99 Denso Sard Supra. This car has 686hp, and maxes out at 230mph. Get in your new car and race it in the Test Track 3 race in the Tuned Super Car section. This will earn 50,000 credits, plus a drag car worth 250,000 credits. Keep repeating this strategy until you obtain the desired amount of credits.

HINT: GETTING MONEY
When entering the Special Events races, it is not necessary to have the same kind of car as the event specifies (i.e. you do not need a muscle car to race in the Muscle Car Classic.) With the exception of the drivetrain specific events (FF, FR, MR, 4WD) and the Tuned/NA races, as long as your car meets the horsepower requirements, you do not need the kind of car that the title specifies. Basically, pick the car that you like the most, and race all of the races you can within the horsepower restrictions. Doing this means you do not have to buy a luxury sedan to compete in the Luxury Sedan Cup, etc.

LOOK CAREFULLY...
When you want to buy a car and you are browsing, make sure you look in the right hand corner of the screen. If an arrow points to the right, click on it to see more cars. This also works with some special models. (eg. Ford has four special models).

DO NOT ATTACK HUMANS
You will encounter your first human in Malchia's domain. He is a vampire hunter garbed in silver armour, shoots silver stakes from a bow, and will be hostile. Leave him alone and continue on to fight the zombie-like vampire. Leave after killing it, and do not go back to the human. The next human you encounter, located in the gear room, should fall to his knees and hold out his arms. The humans

now consider you an avenging angel. Do not attack them, or they will turn on you. Warning: Vampire Worshippers are garbed in red and gold. They wield throwing knives and staffs and will always attack. You may kill them as they are evil. Be sure to check your human targets. You will now be able to peacefully roam through the human stronghold.

FUN WITH HUMANS

To kill your human friends, do it with glyphs. The other humans will not acknowledge that you are responsible. Try the force, stone, and fire glyphs. You can do fun things like sailing a worshipping human against the wall, killing him, and watching as he proceeds to slide into the water only to die again.

BEATING MALCHIA

To defeat the Malchia, lure him under one of the two spike gates and release them right when he is slithering under it. Do this again on the other side of the room. After that, lure him into the center cage, quickly jump out, run to where Malchia started from, and roll the lever. This will cause the large spikes on the ceiling to come grinding down on top of him.

BEATING RAZIEL'S BROTHER

Pull the three stakes out of him to bring him back to life. Lure him into the furnace room very slowly if you move too fast, he will return to his room and you will have to begin again. Turn on the gas and hit the switch after he is in the furnace room to fry him.

BEATING ZEPHON

Bring a torch with you to the fight with Zephon. Run up to his belly, and swipe the torch at the hole for a bit of damage. He will attack with his leg, and get it stuck in his belly. Strike the leg. He will be heavily damaged. Strike the egg hole to cause more damage. Any time he gets a leg stuck in the ground, hit it with the torch, then hit his egg sack to quickly kill him. This is easier than the 'correct' method. After defeating him, you will gain the ability to scale walls.

BEATING RAHAB

You must enter the chamber in the spectral realm. Go to the top pillar where the portal is located and materialise. After a brief exchange of words, your only task is to shoot out the windows lining the room to let in the sunlight. Use the force blast – you do not need Soul Reaver, so do not worry about taking hits. After he dies, you will acquire the swimming ability.

BEATING KAIN (FIRST TIME)

Simply wait for him to materialise and hit him. He will appear behind you 90% of the time. You will acquire Soul Reaver after he is defeated.

BEATING KAIN (FINAL TIME)

Wait for him to materialise and hit him. You need soul reaver to do damage. The spirit forge in the center of the arena always automatically fills your health. Simply run over to it to accomplish this. When you strike him the first time, he appears on the second tier, again usually behind you. Finally, when you hit him on the second tier, he will materialise on the third and highest tier, again usually behind you. Quickly hit him a third time to defeat him.

USE OF THE CONSTRICT ABILITY

First, you must have a circular area around the target. Eg. assume that the target is a Dumahim vampire (the most common in Nosgoth). Now, without using autoface, run a complete circle around the vampire until Raziel is followed by a trace of blue energy. This energy, once fully invoked, will 'constrict' the vampire, causing it to be momentarily stunned – and allowing ample time for you to finish the it off. The Constrict ability has odd effects on humans. They are as follows: 1. Certain humans, once you begin the Constrict ability, will act as though they plummeted into water. If you do not finish the ability, they will 'drown'. 2. The human will get stunned when Constrict is half finished, allowing you to stop and feed on their soul. 3. The most common and normal result is that the human will instantaneously die. The Constrict ability is needed to complete the puzzle in the Chronochamber. Also, make sure to return to areas of Nosgoth you have already visited prior to gaining that ability. You will find that Constrict can be used on many things, and may open up useful secrets (such as Eldritch artifacts, Glyphs, and life force pieces). Constrict does not work on Kain or underwater.

Meryl will be caught with her pants down during an FMV sequence. Look in the vent just before the DARPA chief (Decoy Octopus) to see Meryl doing sit-ups. Leave the vent and re-enter and she will be doing one-armed pushups. Repeat and she will be doing leg stretches on the wall. Repeat again and she will be doing the leg stretches while pantless.
RUN AND SHOOT SIMULTANEOUSLY
Take out your weapon (for example, the SOCOM pistol), then hold Square + X and move Snake on the D-pad. He will run and shoot simultaneously.
ALTERNATE TITLE SCREEN
NB: This code is for the Japanese version of the game. Press the D-pad at the title screen to change the background colors.
ACCESS MEI LING PHOTO SHOOT
To access the photo shoot with Mei Ling (in the 'Extras' option on the Main Menu), you must have a memory in one of the slots that has Sneaking Mode beaten with you having the number-one records on ALL of the Time Attack levels. There's 30 levels (15 – No Weapon, 15 – Socom), so this takes a while.
ALTERNATE WAY TO KILL SNIPER WOLF
When you battle sniper wolf for the second time move all the way to the right after getting to the snowfield. From there use the nikita misiles to kill her. This trick can be easily applied with Bandana on for Unlimited Ammo. While fighting Revolver Ocelot at the 2nd Floor Basement of the Tank Hangar with President Baker tied up in C4 in the middle, try to stun him using the Stun Grenades. While he is stunned, quickly equip the C4 explosives and Bandana for them to be

infinite.Then set them carefully on the side walls, in the centre. But do not try to set them on the floor, because the impact will set the other C4s & the President will be put to death. Do this trick by keeping with the walls so that the C4 might not have any impact on the yellow lines (boundary).Then as Ocelot is ready to go again, carefully detonate the C4s as he passes by that portion of either of the four walls.This will take nearly half of his (Ocelot's) life! There is no need for the use of SOCOM any more. Doing this process twice will terminate him. You must have at least one C4 to do this.

GET ROCKET LAUNCHER

After you get the SOCOM from the back of the truck go into the tank hanger and go backto the truck and wher the SOCOM once was is the NIKITA rocket launcher.

WINNING OVER OCELOTS TORTURE

Use rapid fire ignoring Ocelots chit-chat about it being cheating. If you don't have rapid-fire look at the circle button for better concentration, make a fist, and with your side fist, gently pound the circle button barely lifting up your fist from the button. Don't stop until Ocelot starts talking again. It is very exhausting. Just run from the gaurd. Don't fight – you'll catch a cold. The gaurd has diarrhoea, he'll run to the bathroom again! If you didn't submit, check your items for a timer bomb, read the instructions for it, and live!

For the second, when you're in the torture room give up and the colonel's niece will die. Then when you beat the game save the data and you will get stealth. Although it won't work against bosses.

AVOID DOGS

In the cave with Meryl hit her and the dogs will attack. Jump in a cardboard box and the puppy will pee on you. The dogs won't attack you because you smell like them.

SNAKE IN A TUXEDO AND RED CYBORG NINJA

Play through the game using the saved data from each. Don't submit during the first game, but submit during the second. Also, don't use the Bandana or the Stealth Camouflage during either game or the trick won't work. After you finish the second game, start a third game with the saved data from the second game. When the game begins, Snake is dressed in a tuxedo and when you encounter the Cyborg Ninja, his blue armour will now be red.

RESIDENT EVIL 3 NEMESIS

MERCENARY MODE

Successfully complete the game one time to unlock mercenary mode and save the 'Next Game' file. Start a new game, choose that saved game, then select mercenary mode. This mode involves controlling Carlos, Mikhal, or Nikoli from the train to the starting room with a two minute timer. Killing the various opponents and rescuing civilians during the journey will add more time to the clock. A rank and money will be awarded after the game is completed. The money can be used to purchase better weapons for the next mercenary mode game.

BOUTIQUE KEY

Successfully complete the game one time and wait for the credits to end. You will receive the key to the Boutique on the first street at the start of the game. Use the key to enter and change into an alternate costume.

ALTERNATE COSTUMES

Successfully complete the game under the easy difficulty setting with any rank better than F to unlock Jill's costume from the original Resident Evil and Regina's costume from Dino Crisis. To unlock three additional costumes, successfully complete the game under the hard difficulty setting with a rank of A. This will unlock police miniskirt, disco, and biker costumes.

EPILOGUES

Successfully complete the game under the hard difficulty setting to unlock Epilogues. Epilogues are a short diary description of each character in the entire Resident Evil series which describes what happened with that specific person after their adventure. Getting better ratings can unlock the other epilogues. There are eight total Epilogues that can be unlocked.

JILL'S DIARY

To get Jill's Diary (a file), collect all thirty files in the game in order. Then the first file (Instructions Manual, blue) will become Jill's Diary.

BARRY BURTON ENDING

THE TROLLEY

You will have to fight off Nicholai in a chopper. It is recommended that you bring a Magnum and Grenade Launcher (or Rocket Launcher if it has been found). You can also choose to negotiate with him.

ENHANCED WEAPONS/AMMO

When creating ammo with the reloading tool, save enough gunpowder to mix up the same type of ammo eight times. On the eighth time, the game will prompt "Do you want to create the enhanced ammo?". Select "Yes". This ammo is more powerful, may have slightly different effects, and once loaded into a weapon will change it into an 'enhanced weapon'. Once you have loaded a weapon with enhanced ammo, do not reload it with regular ammo. You can only create two types of enhanced ammo: 9mm handgun bullets and shot gun shells. Also, do not combine enhanced ammo with regular ammo.

MAKE YOUR OWN SHOTGUN

In order to make a shotgun you must have gunpowder BBB, grenade rounds, and the mixing tool. Mix gunpowder BBB with the grenade rounds to make shotgun parts. Next, mix the shotgun parts with the mixing tool to make the shotgun.

THREE JEWELS IN THE CLOCK TOWER

When you enter the room in the clock tower with the three statues holding trays, take the obsidian, crystal, and amber jewels from them. There are three clocks on the wall besides the two dead bodies. Going from left to right, place the amber jewel in the first tray, the obsidian jewel in the middle tray, and the crystal jewel in the third tray. The middle clock will open and you will get a gold gear. Combine it with the silver gear and place it in the slot on the third floor. When you enter the room with the three clocks, walk up to the three statues and take each of the three balls from them. From left to right, set the obsidian, the crystal, and the amber ball in the three clocks. You will get the gold gear. Combine it with the silver gear and you will get the Chronos gear.

STARTING THE TROLLEY

The oil additive needed to start the trolley is located in a locked store room inside the sales office. To unlock it, pick up the flashy remote on a desk to turn on a TV. You will see a commercial about some product from Ubrella Corp. Make note of that product (Safsprin, Adravil, Aquacure, etc.). Go to the nearby computer where Carlos just shot his zombied friend. You will be prompted for a password. Type in the name of the product to unlocked the storeroom.

POLICE LOCKER COMBINATION

When entering the Police Station and going into the door in the top left corner you will reach a room with zombies. After killing them, enter the next room, which contains the lockers. Once there, go to the other side to find a locker with a light on it. The game will prompt for a code. The code is '0131', '0513', '4312', or '0114'. Capcom made Resident Evil 3 hard to cheat by making the combinations for the lockers and locations of items in different numbers and locations. Do things differently in each game and you will get a different game each time it is played.

MEDICAL LOCKER COMBINATION

To get the combination to the medical locker in the hospital, go to the room next to that room. Check the dead body in the corner to find one of the following combinations: '513', '101', '498', or '517'.

FIGHTING NEMESIS

The Nemesis is left-handed and uses that hand to grab you. When fighting him, shoot him two times and run past his right side. Shoot twice and repeat the process. This only works when he does not have his rocket launcher.

GRENADE LAUNCHER

Use the S.T.A.R.S Card in the computer in the main entrance of the Police Station. When you get the S.T.A.R.S Emblem Key, go to the S.T.A.R.S Office. When you are in the office, go to the big locker next to the out-of-commission message receiver. Open the locker and you'll get a Grenade Launcher.

Some people may find the Magnum in the big locker. In this situation, the Grenade Launcher may be found in the Sub-Station. There are two different ways to get the Grenade launcher. There is one in the Sub-Station when the game is first played. The other is available after the game has been completed once. Go to the S.T.A.R.S. office and go were the Magnum gun was originally obtained.

ROCKET LAUNCHER

In the dead factory, go to the machine next to the water sampler puzzle. Use the facility key where that game states a small plastic card can be inserted. Take the other facility key that is given and go to the steaming room where the small card-activated elevator is located. Go down and use the facility key on the door where that game states a small plastic card can be inserted. You will find a rocket launcher with four shots at this location.

MAGNUM

Go directly to the Evidence Room in the Police Station. Go to the number-based lock with the S.T.A.R.S Emblem Key. Use one of the following three passwords: '0131', '4011', or '4312'. You will receive the Emblem Key. Go to the locker in the S.T.A.R.S Office. Open the locker to get a Magnum.

MINE THROWER WITH TRACKING

Either get $9999 in Mercenary mode and buy unlimited ammunition or use the infinite ammo kit obtained from Nemesis on the Mine Thrower. The Mine Thrower will have tracking bullets which will show the directions to the zombies.

WATER COMBINATION CODE

At the water sample machine near the dead factory, enter '1 Right' for A, '3 Right' for B, and '4 Left' for C. That should unlock half of the lock to the door next to the elevator.

MUSIC BOX CODE

One of the codes for the music box in the top or the tower is Down, Up, Up, Down, Down, Up.

VACCINE MEDIUM COMBINATION

One of the combinations when making the vaccine medium in the hospital is 2 and B.

SAVING AMMO AND HEALTH

You can save ammunition when fighting zombies by waiting until they are right in front of you. Then, aim upward and shoot. If done correctly, your shot will blow their head off, even with a handgun. In some rooms there are barrels or red small boxes on the wall. Wait until the monsters in that room are next to those objects before shooting the barrels or boxes to blow them all to pieces. When fighting spiders, shoot them when they are on the wall or ceiling to drop them to the floor. Then, run behind them and then start shooting. The best way to get past brainsuckers is to just run past them. When fighting the dogs, just shoot them. When they jump at you, dodge them by pressing X When fighting hunters, shoot them, and when they jump, run under them. When fighting Nemisis, start shooting him and when he tries to grab you, run. Repeat until he bleeds purple liquid from his tentacles.

UNLIMITED MONEY AND TIME

In Mercenaries Mode: Get to the alley that has three dogs and a crate. Kill two of the dogs get on the crate. Continuously dodge the remaining dog for a time and money bonus for dodging.

CHECKING ZOMBIES

To tell if zombies are still active after they are cut in half, leave the room. If the zombie is still on the floor, he is still active. Walk back and forth in front of their head or enable the auto aim feature and press Aim.

RUN ON ONE FOOT

When running, quickly and repeatedly tap Square. Jill will run on one foot, and her other foot will never touch the ground.

GLITCH: LADDER SCENE

When you are in the park with a cemetery and find the park key, a giant worm/snake appears from under the ground. After killing it, the only way out is to climb a fence. When you climb the fence, the game shows your character going up a ladder.

RIDGE RACER TYPE 4

BAD ENDING Prizes: Gas tank, Chainsaw, Rock Drill. The Gas tank is found in the gas station. It is used to power the other two prizes, but only one of the two weapons can be taken. The rock drill is in the room under the drawbridge control room. It's not very good. The Chainsaw is in the smashed window of cut-rite chainsaws, and is a lot better than the rock drill. These two weapons are useful against slow ground enemies, but the hammer works better, and you don't need to beat the game to get it.
BAD+ ENDING Prize: Katana. This is found in the previously locked room in the Dog House on Levin Road. It WAILS any slow moving enemies, and you lunge forward with every stroke. This opens the respective door and allows the game to proceed.
HYPER BLASTER
The Hyper Blaster is obtained by unlocking the UFO ending, detailed below. Note: Channeling stone shows up on the Game Ending screen, not this weapon. The channeling stone is another possible item (in the convenience store in Next Fear mode if the game is completed with a Good+ rating). HOME RUNS

Find an enemy worm standing fairly close to the edge of the level. Use the baseball bat to hit him into the water to get a "home run" complete with baseball bat cracking sound, baseball message (like "It's Outta Here", or "Bases Loaded"), and organ music.

COOL AS ICE LEVEL

The ice mission near the start is easier than it looks. Collect as many crates as possible without using any utilities, then use the jet pack to get up to the next section near the guard. Collect all the crates there and stand on the polar bear's head. Point the flame thrower at a spot just to the left of the guard, and fire. You should get through the barrier protecting him, and the flames should send him into the water. Walk forward until you get both the uzis, then jet pack over onto the polar bear. Grab the battle axe and shoot the next closest crate with the uzi, standing back to avoid damage, to blow a hole giving you access the area where the Guard worm is. Use your other jetpack to go behind him then blast him into the water with your other uzi.

HINT: SUPER SHEEP RACING

If you have collected a crate at the very left of the level, and the next crate appears at the very right, deliberately crash or detonate your current sheep and set off a new one. This will save time.

HINT: DESPERATION ATTACK

If you are almost dead and a lot of worms are nearby, use the Banana Bomb to blow them all up.

While standing on top of the first block, release the block that Krusty is carrying and trap the rats. If the area where the rats are trapped is only as wide as one block, all the rats in that space will be compressed into a single rat. This is especially useful in areas where Krusty must build stairs for the rats to climb in order to reach the trap.

EXPAND YOUR BOMB BAG

On your way to Restoration Wall to fix the Tuni Nut (Level 4), you'll push a red rock that changes the landscape. Once this happens, go back through the cave and return to the time hole above. Go down the ladder near the hole, then get next to the vine sprout. Play your Harp here to send things back to the present. When you arrive, climb the vine to a cliff with a small pool of water on it. There is a sign here that tells you not to throw anything in the water. You like to break the rules, right? Chuck a Bomb into the center of this pool. A floating eye with wings will appear and ask you what you threw in. Tell him you tossed in a regular Bomb. He'll expand your Bomb bag to hold 30.

EXPAND YOUR SEED SATCHEL

Once you have the Seed Shooter, return it to Tingle, using the cave below (the one with the crystal ball in it). When you talk to him again, he will expand your Seed Satchel. Now you'll be able to carry 50 Seeds of each flavor.

SECRET 100 RUPEE ADVANCE SHOP

If you've got a Game Boy Advance, you can get into the Secret 100 Rupee Advance Shop in Oracle of Ages. Plug your GameBoy cartridge into your GBA, then go to the house with the two doors in the village. If you have a Gameboy Colour then the doors are going to be locked. Sorry, if you're playing using a GBA then the doors are unlocked and you can go straight in. The shopkeeper will welcome you and he will begin talking about how only GBA players can use this store, and for being a GBA player you can buy items for 100 rupees each. A lot of the items in the store are available elsewhere, however you can get a special ring only available to GBA owners.

TRADE ITEMS TO GET THE NOBLE SWORD

Trading Items provide another quest for Link. You don't have to participate, but if you do, you'll reap a powerful Sword upgrade which will make the rest of the game much easier. Although you can trade items as you go along, I suggest doing it all at once right after the Level Four Dungeon.

1. Poe Clock
Get this from the Poe in the Graveyard.
2. Stationary-Past
Give the Poe Clock to the Postman to get the Stationary.
3. Stink Bag-Past
Go to the Toilet shack and give the disembodied hand the Stationary to get the Stink Bag.
4. Tasty Meat-Present
Go to Crescent Island. On the east shore is a teepee with a chef inside. Give him the Stink Bag and he'll trade you some Tasty Meat.
5. Doggie Mask-Present.
Go to the house with the Mask Salesman, just west of the drawbridge up to the Nuun Highlands. For the Tasty Meat, you'll get the Doggie's Mask.
6. Dumbbell-Present
Give the Doggie's Mask to Mamamu Yan, who lives near the Black Tower near the south of Lynna City. She'll give you the Dumbbell in return.
7. Cheesy Moustache-Past.
In the basement of Middle House in Symmetry city, you'll find a thin man wobbling back and forth. Give him the Dumbbell, equalizing his weight. He'll give you a Cheesy Mustache in gratitude.
8. Funny Joke-Present
Go to the east bank of the center stream in Lyanna City. Give the Cheesy Moustache to the right of the two lads standing there. He'll give you a Funny Joke to tell.
9. Touching Book-Past
Warp to the past and go find the depressed guy hanging out alone in his house – he's just to the left of the Target Range. Tell him the Funny Joke and he'll give you the Touching Book.
10. Magic Oar-Present
After you get the Touching Book, the next time you run into Maple, she will give you the Magic Oar.
11. Sea Ukelele-Past
Go to Rafton's raft shop on the east shore of Lyanna Village. Give him the Magic Oar to get the Sea Ukelele.
12. Broken Sword-Past
Go to where your starting point would be in the Present. Notice the holes in the ground? Use the Switch Hook and the tilted blocks to get across. Move down the coast until you find a small shack. The Zora inside will give you a Broken Sword for your Ukelele.
13. Fix the Sword
To get the Broken Sword made whole again, go back to Restoration Wall and talk to Patch. He'll have you participate in another fixing ritual (like the one you did to get the Tuni Nut fixed). Once you successful complete the slightly harder ceremony, your Sword will be fixed... into a Noble Sword.

POKEMON RED/BLUE

BEATING THE BOSSES

Here are your best bets for beating the Pokemon Gym Leaders:
Brock: Use water or grass Pokemon against this rock trainer.
Misty: Use grass pokemon or electric to defeat this gym leader.
Leiutenant Surge: Use a rock or ground pokemon and he's toast.
Erika: Use fire pokemon or flight against this plant lover and shatter her dreams of fighting you again.
Sabrina: Use bug or ghost against this psychomaniac and she is a goner.
Koga: This poison pokemon lover will be deafeted easily by using psy pokemon.
Blaine: This fire trainer will use fire pokemon against you so you can use water or ice.
Final boss: Giovanni, the team rocket leader, is the final gym leader - use water, ice, plant and he's out of there (and talk to him again and he says something to you).
In the Indigo Plateu you find 5 pokemon masters. Use this pokemon lineup for a better chance of success:
Plant: Water, Plant, Flight, Ice

Psy: Ice or Dragon.

CELADON CITY SLOT TIP

All of the slot machines have different odds, which change every time. Play each machine 4 times, and if it hits 2 or more, then stick with that one, because it's probably hot. If the slow machine forces you really close to a 777 or Bar Bar Bar it will probably give you one or the other soon.

CLONE POKEMON

Trade the Pokemon to be cloned, and have the other player select a Pokemon that he or she does not care about. Trade them, and make sure the player receiving the bad Pokemon can see the other player's screen. When the Game Boy that receives the good Pokemon's displays "Waiting", get ready to shut the other Game Boy off. When the "Waiting" message disappears, turn off the Game Boy that is receiving the bad Pokemon. When the "Trade completed" message appears, turn off the remaining Game Boy. Both games will have the same good Pokemon when they are turned back on.
Note: Do not attempt this trick with any saved games you wish to keep, as it can corrupt those files if done incorrectly. This trick requires another Game Boy, link cable and Pokemon game.

CUT DOWN GRASSY AREAS

Once you get the HM "cut", your pokemon can cut down grassy areas. Use "cut" and it will cut a two by two area. Wild Pokemon will not attack you in the area you cut.

DUPLICATE ITEMS

To get 99 of any item, first put the item you want to multiply in the sixth item slot. Now use FLY and go to Viridian City. Talk to the old man almost all the way north of the town. When he asks if you are in a hurry, say no and watch him catch a weedle. Right after that, fly to Fuchsia city. Make your way south and, when you you reach the water's edge, use SURF and make your way to Seafoam island.
When you get to seafoam island, swim up and down the beach until you run into a Pokemon called "M" (Missingno.) Once you see him, kill him or run away. DO NOT CATCH HIM! After that, you should have multiple copies of your sixth item!

EASY LEVEL GAIN

To easily gain experience, simply switch the Pokemon you want to train with the top Pokemon on your list. When you go into battle the Pokemon will pop out. You can then switch to another Pokemon. Once you win the battle the beginning Pokemon and the fighting Pokemon will both gain experience points.

EXTRA DAMAGE

While fighting, select your desired attack. When it says you are going to use that attack (eg. "Venusaur used Razor Leaf"), hold down the A button until your opponent's life stops draining. If your timing was right you'll do more damage than usual.

FIGHT LAND CREATURES IN WATER

To fight creatures that normally live on land in water, go to the water around Cinnabar Island or Seafoam Islands (The only place you can be randomly attacked while swimming.) Swim along the shore of any island and you will fight land creatures. (You have to swim on a place where the square is half land and half water.) Instead of fighting a set group of monsters in the water, you actually fight monsters from the last place you were. So to get safari zone monsters, you need to go to the section of the safari zone with that monster, let your time run out, then go to the coast. Using this trick I have caught Kangaskhan, Scyther, and Tauros!

FIGHT THE ELITE FOUR MORE THAN ONCE

First collect all eight badges. Then go through victory road. Next beat the Elite Four. After that your Pokemon will become Hall of Famors. Then the credits will show, following by your game resetting. Go back to your Continued Game. You will be back at home. Then fly back and beat them again and again. This helps your higher leveled Pokemon becaus you can still get a few thousand exp.

GET AMNESIA PSYDUCK

Have you ever wondered how you can get the elusive Amnesia technique? Well, it's hidden deep in Pokemon Stadium for the Nintendo 64. Unlocking it will take a while, but it's definitely worth it. You have to register ALL 151 Pokemon in the Hall of Fame. Whenever you beat a tournament (or Gym Leader Castle), your six Pokemon are entered into the Hall of Fame. It doesn't matter whether you use rental Pokemon or your own, but you can't have any gaps. Once you've filled it all up, you are awarded a free Psyduck bonus Pokemon that knows the Amnesia technique. You can now upload it to your Game Boy pak and use it in your quest.

GET MEWTWO

After you have gotten all eight of your badges you need to go beat the pokemon league. The credits will roll and then the menu pops up again. Do not reset the game! Go to Cerulean Citygo north to the brige where you faced 5 trainers before the path to Bill's house. Turn left and there will be a large area of water. Surf until you get to a cave. You will find Mewtwo in that cave.

GET MISSINGNO

Warning! Catch missingno in the red version may delete your old game and prevent you from saving any other games. To get MissingNo (a glitch) go to Cinnabar Island and go into the Pokemon Research Labratory and trade with anyone in the first room. Then leave the Lab and go to the EAST of Cinnabar Island and surf up and down on the part where the land meets the water. Eventually the battle screen will come up and the screen goes black for about 5 seconds. Once you find him use a Level 30 to 40 Pokemon. This is because Missing No., even at Lv. 80, has a VERY low defense rating. So get him down pretty low. Even at low he is still extremely difficult to catch. So next get a Pokemon that knows a sleep move and put him to sleep. Follow this up with a couple Ultra Balls and you should have him.
NOTE: Catching MissingNo. may cause minor glitches. Also note that if he evolves (i.e., by receiving a Rare Candy) he will turn into a Khangiskahn.

GET SURFING PIKACHU

Did you know that you can get a Pikachu that knows the Water technique Surf? Here's how you can get it (outside of winning a Nintendo Pokemon contest): Surfing Pikachu is hidden in Pokemon Stadium for the Nintendo 64. To teach your Pikachu Surf (a technique it can normally not learn), you need to first unlock the R-2 (Round 2) mode. Then do the following: Enter the R-2 Prime Cup's Master Ball division (you have to beat the first three divisions first). Assemble a team that contains a Pikachu that does not yet know Surf. You have to use a Pikachu from your Game Boy game. You cannot unlock Surfing Pikachu using a Rental Pokemon. Do not register your team! Pick it directly from your Game Boy cartridge. You now have to beat the Prime Cup's Master Ball division using a three Pokemon team that always contains Pikachu. Pikachu has to be in every one of the eight battles. You are not allowed to use any continues. If you do, you won't get Surfing Pikachu. Once you have fulfilled all the above conditions, you are shown an award screen with Pikachu standing on a surfboard. From here on, Pikachu can use the Surf technique both in battle and during gameplay (Game Boy versions only). In Pokemon Yellow, you can now also access the hidden Surfing Pikachu mini-game on Route 19. There is also a GameShark code that lets you access Surfing Pikachu, but we advise against using it, since it can mess up your Pokedex and save data.

GET THE MIMIC TM

Buy a Pokedoll in Celadon Mart, then FLY to Saffron and talk to the Copycat. She will give you the Mimic TM.

INVISIBLE WALLS IN KOGA'S GYM

If you look at the floors in Koga's Gym you will notice it has lines. In some spots you will see little gaps in the lines. These "gapped lines" are the invisible walls.

LEVEL 100+ POKEMON

Follow these instructions to catch pokemon with really high levels. Talk to the old man in Viridian City who shows you how to catch pokemon. Fly directly to Cinnabar Island. Put your strongest pokemon on your team. You might want to save now. Surf on the shore where the land touches water. Keep surfing until you run into one of these strong Pokemon. These Pokemon are well above level 100. Unfortunately, they will revert back to Level 100 if they gain any experience points. Rare Candy is the only thing that raises their level. They can be used in a two-player battle without losing their level, so have fun liquidating your friends!
Note: This is a bug in the game. It will not work in newer versions of Pokemon and may crash your game if you try it.

SECRET COINS

At the Game Corner there are secret coins lying around. You can get these coins by walking around and pressing the A button.

ALTERNATE POKEMON COLOURS

There are Pokemon hidden in Gold/Silver that

have alternate colours, aka shiny status. There is no easy way to find them (except for the Red Gyarados in the Lake of Rage) as they appear at random – but they're out there. If you see specially coloured Pokemon, be sure to catch them as they are very rare. You can recognise them by the sparkle effect when they appear in battle, or by checking on the Pokemon Status Screen. Next to the Male/Female symbol, these special Pokemon are marked with three dots.
There are any number of these rare types, including alternate versions of Nidoking (dark blue), Golbat (purple/green), Tentacruel (green eyes), Rapidash (purple), Scyther (orange/green), Hoothoot (yellow/purple), Sudowoodu (green/red), Ho-oh (yellow/orange), and more.

BREEDING

To breed all sorts of Pokemon just get a ditto and any other gender Pokemon. You cannot use the following pokemon: Mewtwo, Mew, Luğia, Ho-oh, the new breeding Pokemon like Igglybuff, or Elekid.

SILVER ONLY

Once you have completed the radio station part and got rid of Team Rocket, go back to the cave with the waterfall in it. Now push aside or smash the rock on the side of the waterfall. Next walk through the gap. Depending on what time you try this, you will either see a rare item on the ground or a mystical pokemon like Missingo.

SHINY POKEMON TRICK

If you want the full benefit of this code, use a Pokemon that can evolve. Otherwise, there will be some confusion with names and so forth. First, place a flying Pokemon that has been taught to fly as the first Pokemon in your lineup, the "Golden Gyarados" as the sixth position, and the Pokemon whose colour is to be changed in the second position. After doing this, put all of the Pokemon back into the PC except the first one. Next, take out the Pokemon that was in the second position before, the one that will be changed. Enter the bug-catching contest that is near Kogane city. This is held on Tuesdays, Thursdays, and Saturdays. As soon as you enter it, exit right away. When the clerk asks you if you want to quit, make sure you say no, which is always the lower answer. Now use your Flying Pokemon to fly out of the contest. Store the Pokemon that will be changed in a PC, then go back to the contest and say yes, the top answer, to complete the contest. Return to a PC, withdraw the Pokemon, and check its status screen. The Pokemon will be a different colour, but it will have Gyarados's name. Grow the Pokemon until it evolves. You may want to use Rare Candies if you have any. Now when you go into battle with the evolved form of the original Pokemon, it will have a shining status.

Instead surf across the water and there should be another cave, go into that one and use flash. Travel around until you see a man. Battle with him, if you win he will give you a Pokemon called Tyrogue (Baruki). He can evolve into hitmontop, hitmonchan, or hitmonlee. Train him to level 20 and if his attack is higher than his defence then he will become a hitmonlee. If his defence is higher than his attack then he will become a hitmonchan. SECRET CHAPTER

Successfully complete the game. Then, go to the level in which you play basketball against the giant rabbit. Throw an enemy at the wall next to his lair. The wall will break. Throw the enemy again at the next wall to reach a door. Enter the door and you will complete the level unlock; a new chapter will be available.

HINTS

Hint: Stay flat: Jump at the birds while flat to prevent them from returning your character to normal. If hit correctly, they will be stunned and leave the screen.
Hint: Moving on conveyor belts: Pick up an opponent and carry it while walking over the conveyor belts to move without being pulled or pushed to either direction. Hint: Playing basketball against the big rabbit:
When playing basketball against the big rabbit, after jumping on him to turn him into a ball, pick him up, jump in the air fairly close to the basket, then hold Up and press A. Wario will do a better basketball shot, and allow a more fast-paced game.
Hint: Multiple level tracks: Do not wake up in the first stage. The soldiers will pick you up and throw you out of the castle before taking it over. In the "Defeat the giant snake" level, while in the chamber before the location you go to if the snake eats you, run at the wall on the right and jump. In the SS Teacup "Drop the anchor", while in second room, the bottom the wall on the left can be broken by an enemy.
Hint: Really Final Chapter tips: For the first section, go to the right of the screen, and use the ground slam move until you manage to smash through the ground. Keep going from there to reach the door. Then, get past the flying spike men and jump on the floating cupboards to get across. After the second section of this kind, stand on the very edge of the half-platform and execute a high jump to the next half-platform. On the third and last section of this kind, do not get on the first cupboard, and wait until the second one appears. There are some more small platforms against the wall. Do the same technique to get up them. When you reach the section with the shocking bee, stun him, then carry him through the stage. When you see a narrow tunnel that can be entered by ducking, take the bee towards it. Throw the bee in the tunnel, but not too hard or he will die. When he comes back to life, crawl through the tunnel. This will knock the bee through the tunnel. After getting out the other end, throw the bee at the enemy blocks to smash them and allow you to get to the next door. In the next room, pick up the spear man and drop him on the platform that Wario cannot stand on (it is faint and may look like a decoration on the wall). This next part is very tricky. Jump on him, then do a high jump off him (Jump and Up). Land on him, and do the same thing to get across to the other side. Then, climb the stairs, and do exactly the same thing the other way. It will be harder here because of the ceiling. At the end, go through the door. There is a section with about 15 of those platforms up against the wall. However, it is actually easier than it looks. In the next section, jump up close to the floating bird and do a high jump off of it when it is at the right spot to jump up to the next platform. Use this technique to get through the entire section. In the next room, there are some conveyor belts running the wrong way. Get onto the first one, and charge along it. As soon as you are about to hit the bit of the ceiling hanging down, duck, and your character should slide under it. Do this a few more times and you should be past that section. Then, when there are conveyor belts and spikes on the floor, charge across the conveyor belt and jump when about to hit the spike. You should hit your head on the ceiling and land on the other side. Do this a few times, and go through the door. In the next room, get squashed by the big rock. Get past the dripping water, execute high jumps up the platforms on the left, get past two more water drips, and walk to the very edge of the big platform you are standing on. Jump to the right from that location. Use your gliding action well to get to the end, and get hit by the dripping water there. Then, go through the door, and into the final room.
There is a giant spear man walking along a platform that Wario can not touch, and a lot of spikes. Jump off, do a high jump off him, and back onto your own platform to stun him. Then, ground-slam him ten times. Hopefully, your "stunning" jump will knock him to the very side of the platform. If he falls off, all is lost. Jump off, and ground slam the side of his body. That will knock him to the other edge of the platform. Fly off him, and land on the part of his body that will send him back to where he was. Hit him ten times, and he will die. You do not have to get the glowing coin, simply killing him will finish the level, and the entire game.

GLITCH SAVED GAME DELETION

If you play the game on a Game Boy Colour and save a game, then play the game on a classic Game Boy, the saved game will be deleted.

HOW TO CHANGE THE TIME OF DAY

If you have entered a stage when it is night, press start, then "to map", and you will see the backround change to day (if it was night). Re-enter the stage and it will change to day, or by getting the stone of day or night you can select it by pressing select on the map.

FUN WITH HUMANS

To unleash your wrath upon your unsuspecting human friends, go ahead and kill them with glyphs. The other humans will not acknowledge that you are responsible. Try the force, stone, and fire glyphs. You can do fun things like sailing a worshipping human against the wall, killing him, and watching as he proceeds to slide into the water only to die again.

DEFEATING MALCHIA

To defeat the Malchia, lure him under one of the two spike gates and release them right when he is slithering under it. Repeat this on the other side of the room. After that, lure him into the centre cage, quickly jump out, run to where Malchia started from, and roll the lever. This will cause the large spikes on the ceiling to come grinding down on top of him.

DEFEATING DUMAH

Pull the three stakes out of him to bring him back to life. Lure him into the furnace room very slowly – if you move too fast, he will return to his room and you will have to begin again. Turn on the gas and hit the switch after he is in the furnace room to fry him.

DO NOT ATTACK HUMANS

You will encounter your first human in Malchia's domain. He is a vampire hunter garbed in silver armour, shoots silver stakes from a bow, and will be hostile. Leave him alone and continue to fight the zombie-like vampire. Leave after killing it, and do not go back to the human. The next human you encounter, located in the gear room, should fall to his knees and hold out his arms. The humans now consider you an avenging angel. Do not attack them, or they will turn on you. Warning: Vampire Worshippers are garbed in red and gold. They wield throwing knives and staffs and will always attack. You may kill them as they are evil. Be sure to check your human targets. You will now be able to peacefully roam through the human stronghold.

DEFEATING ZEPHON

Bring a torch with you to the fight with Zephon. Run up to his belly, and swipe the torch at the hole for a bit of damage. He will attack with his leg, and get it stuck in his belly. Strike the leg. He will be heavily damaged. Strike the egg hole to cause more damage. Any time he gets a leg stuck in the ground, hit it with the torch, then hit his egg sack to quickly kill him. This is easier than the "correct" method. After defeating him, you will gain the ability to scale walls.

THE LAST LIEUTENANT

The Soul Reaver developers claimed that they did not have enough time to implement every section of the game. Apparently Raziel's last brother, Turel, was left out of the game.

DEFEATING RAHAB

You must enter the chamber in the spectral realm. Go to the top pillar where the portal is located and materialise. After a brief exchange of words, your only task is to shoot out the windows lining the room to let in the sunlight. Use the force blast – you do not need Soul Reaver, so do not worry about taking hits. After he dies, you will acquire the swimming ability.

DEFEATING KAIN (FIRST TIME)

Simply wait for him to materialise and hit him. He will appear behind you 90% of the time. You will acquire Soul Reaver after he is defeated.

DEFEATING KAIN (FINAL TIME)

Wait for him to materialise and hit him. You need Soul Reaver to do damage. The spirit forge in the centre of the arena always automatically fills your health. Simply run over to it to accomplish this. When you strike him the first time, he appears on the second tier, again usually behind you. Finally, when you hit him on the second tier, he will materialise on the third and highest tier, again usually behind you. Quickly hit him a third time to defeat him.

You now have passed the stage, but do not end the second lap. Find a good, straight portion of road. You get Kudos for turning with the handbrake. Go to one side of the road as fast as you can. As you are approaching, do a 180° turn using the handbrake. If done correctly, the words "Wey Hey" should appear on the screen. Next, drive the way you are facing to the other side and do the same. When moving the wrong way, you need to spin 180° in order to get the Kudos. Just keep repeating this, then finish the race. For every five minutes that you do this, you will get approximately 1000 Kudos. There is no time limit. The best city for doing this trick is San Francisco, as it has wide roads. Play jokers to get more points if you do this for 20 minutes with a joker, you can get more than 8000 Kudos in just one race.

Costumes	Grade
5	A
4	B
3	C
2	D
1	E

ANSWER FOR COMPUTER IN SALES OFFICE

When you go in the Sales Office there is a computer on the desk you will need a code for. To get the code use the remote on the table and watch the ad on TV. The name of the product is the code. Here are the product names. One of these will open the door: ADRAVIL, AQUACURE or SAFSPRIN.

BOUTIQUE KEY

To acquire the Boutique Key, which unlocks the Boutique in Uptown (where all the extra outfits are), finish the game in less than 7 hours using no more than 30 Ink Ribbons.

DEFEATING FINAL NEMESIS

When confronting the final boss, (Nemesis' final transformation) make him retreat into the corner from where he came from by your rocket launcher, and grenades, then you have to get the cannon online by PUSHING IN the three power sources, marked 1, 2, 3. When that is done, fire the cannon to dispose of the debris, then it will automatically fire again, at Nemesis. You then have the choice to finish him off yourself (this is an FMV!) or just running. It's best to finish him with the FMV, because this unlocks more secrets in the end.

DESIGN CHRONOS GEAR

Combine the Gold Gear from the Clock Goddess Puzzle with the Silver Gear. The Chronos gear activates clock bells. Insert it into the bell mechanism on the 3rd floor of the Clock Tower.

EXPLOSIVE SHOTGUN SHELLS

If you mix eight gunpowder B's, shotgun rounds, you will have enough experience to create the explosive shotgun shells. Which is one of the best ammo's you can get.

GENERAL NEMESIS TIPS

If you take on Nemesis the best strategy is to run by his right side. He is a lefty so he will always try to grab or pummel you into submission with his left hand. Once you're a little ways behind him (make sure it's not too far otherwise he will run at you, then your in trouble) take a shot and run by him again. Keep doing this until he falls over. He will get back up so continue until you see the purple blood from his body. If you're playing HARD mode, make sure you pick up the item.

GET THE GRENADE LAUNCHER

In the Policestation: If you go into the save room before you go to the police station and mix the A and B gunpowder on the shelf to make C and then mix it with the gunpowder A that you got at the warehouse. Combine it with your reloading tool to make grenade flame rounds you will always get the grenade launcher in the S.T.A.R.S. room.

INFINITE MONEY TRICK

Use this method to get all the infinite-ammo weapons and infinite weapons pack. In the mercinary mode go to the area with the dumpster and the hop skotch paintings (the one right behind the bar.) Go up the steps and take a right. You will then go north until you get to the fork. Go through the door and you will be in the deadend alley that is boarded up by red and white boards. This can be done with all 3 mecinaries. There are three dogs here. First kill 2 dogs immediately. Then lure the remaining dog to where the boards are stacked up. Climb up onto the boards. Go to the opposite end and watch as the dog makes attempts to jump at you. Take a small step forward and press R Trigger right before he jumps. Your character will jump backwards and get a dodge bonus. Immediately after the character dodges, press R Trigger again to pick up a combo for your dodge bonus. Repeat this process to rack up tons of money and time. It takes time, but it is sure worth it.

JILL'S DIARY

Collect all 30 notes and books in the game to replace the first book in your file with Jill's Diary. Jill's Diary reads as followed:

August 7th. Two weeks have passed since that day. My wounds have been healed, but I just can't forget it. For most people, it's history now. But for me, whenever I close my eyes, it all comes back clearly. Zombies eating people's flesh and the screams of my teammates dying. No, the wounds in my heart are not healed yet...

August 13th. Chris has been causing a lot of trouble recently. What's with him? He seldom talks to the other police members and is constantly irritated. The other day, he punched Elran of the Boy's Crime department just for accidentally splashing Chris's face with coffee. I immediately stopped Chris, but when he saw me he just gave me a wink and walked away. I wonder what happened to him...

August 15th. Midnight. Chris, who has been on a leave of absence for a "vacation," called me so I visited his apartment. As soon as I walked into his room, he showed me a couple of pieces of paper. They were part of a virus research report entitled as simply as "G". Then Chris told me that, "The nightmare still continues." He went on to say that, "It's not over yet." Ever since that day, he has been fighting all by himself without rest, without even telling me...

August 24th. Chris left the town today to go to Europe. Barry told me that he would send his family to Canada and then he would follow Chris. I decided to remain in Raccoon City for a while because I know that the research facility in this city will be very important to this entire case. In a month or so, I'll be joining with them somewhere in Europe. That's when my real battle begins.

GLITCH: GRENADE LAUNCHER AMMO

With this code you can put more than 6 rounds into your grenade launcher at once. If you have 6 fire rounds in your grenade launcher, and you have 138 regular rounds in your item box, combine the ammo onto the grenade launcher with the fire ammo in it (it works with any ammo as long as the two are different) and the 6 fire ammo should be in your item box and the 138 in your gun! No reloading.

MERCENARIES TIME BONUSES

In the mercenaries game, you beat the monsters to get extra time. The BIG monsters give BIG time, as follows: Nemesis (standard) – KO 10 seconds. Nemesis (standard) – Kill 20 seconds. Nemesis (mutated) – Kill 120 seconds.

The mutant nemesis can be found in the car park area outside the garage. It takes 5 rocket launcher shell as a minimum.

On the area where there are a lot of Zombies (the y-shaped alley) shoot the 1st zombie cop as you come through the door, then, peg it down the alley to lure the zombies to you. When they are quite close, press R Trigger (make sure you are 2 screens from the RED BARREL) and shoot. You can get a maximum of a 90 second bonus.

To get a better grade, and some extra ammo, rescue the people who are trapped in the mercinaries game. Try looking in the garage, the press office, the sub station, the medical store place (with the safsprin door) and other key places in the game.

SOLVE CLOCK GODDESS PUZZLE

The object of the Clock Goddess Puzzle is to get the centre clock in the Clock Tower to read 12 o'clock. Collect the Amber, Crystal and Obsidian gems from the statues and go to the three clocks on the opposite wall. Facing the clocks, place the Amber gem into the Past clock, the Obsidian into the Present clock, and the Crystal into the Future clock.

If done correctly, the Present clock will open, revealing a Gold Gear, a Mercenary's Pocketbook (next to the bodies in the corner) and M.T. rounds (in the alcove).

EXHIBITION SONGS
This isn't a code, but more of a cool trick that works with the game. You'll have to get a CD or MP3 of the songs mentioned, but if you play them with certain characters, the timing works out so it looks like the characters movements are going with the music. Below is a list of characters, the songs that work with them, and when to start them. Remember to put the exhibition on Loop A.
Taki - "Boom" by Bloodhound Gang, start the second you see her.
Taki - "Yoda" by Weird Al. Probably one of the better ones. Unsure of the starting time, try when you see Taki start. You'll know if you got it right.
Mitsurugi - Antonio Bandaras song at the begining of "Desperado". Start it when he starts to draw his sword.
Mitsurugi - "Asleep at the Wheel" by Bloodhound Gang. Start the song, and push A on Mitsurugi after the track has been playing for 3 seconds (while you're hearing the word "And")
Kilik - "Now You're a man," by DVDA, start it as soon as you see Kilik.
Xianghua - "Walking On The Sun" by Smash Mouth, start when she starts. This one works the best out of them all. Almost every movement times out perfectly.
Astaroth - "Always Look on the Bright Side of Life," by Monty Python. Start when he starts. The chorus should start when he starts running in a circle.
Sophitia - "Alabamba Song," by The Doors. Starting this one is awkward. It begins while her exhibition is loading. Trial and error. You'll know when you have it.

HOVERING (GLITCH)
This is a glitch, but to hover you must go to practice mode.
1. Select Cervantes
2. Kilik as CPU
3. Use Cervantes catch move (upper cut him and press Down and Y — - doesn't apply if you change controller settings)
4. Right before Kilik hits the ground, pause the game.
5. Go to instant replay.
6. As Cervantes finishes his move, press Start to return to normal fighting sequence.
7. When you return to the fight, Kilik will be in the air flying and you can control him.

You still have to complete the final stage in hard mode, but some tough sections (such as the battle with Zod) are a lot easier.

BOSS STRATEGY

For The boss after the nun kills herself (the dragon guy)there is a very easy way to kill him in the easy and normal game settings

1. Quickly move in close and use both of your specials (they will cause damage and push him away keeping you out of danger)

2.Next move in and use the jumping combo (jump and while still going up press "A" and then press "B" on your way down) He/she/it? or whatever it is will then faulter leaving itself open to an attack and this attack can be the jumping combo which will stop him from attacking you at least 9 times.

FINAL BOSS TIPS

The last guy in this game is by far the easiest if you know what to do. The one thing NOT to do is to get close and hit him with your sword! Instead run as far away as possible (watch your feet they will stop moving forward) and then turn around hit him with either your arrows (or darts whatever they are) or your throwing knives. If done correctly you will never get hurt. The only drawback— It takes a hell of a long time but if you are on hard mode and he seems too hard then this is how you should do it (at least untill you get better at dodging a 20 ton creature' attacks) I found this out late at night when I was eating with one hand and playing with the other. Trust me it really works!

Go straight and don't try and turn while in the loop or you will fall. It's right at the top. This is also an easier way to go. Be careful. Other trickers can take your globe away by touching you.

DRAGON KAZOOIE
Did you know that there is a way to turn Kazooie into a dragon? You will need the Ice Key, the Mega Glowbo and Kazooie's Talon Torpedo Move for this transformation. To get the Ice Key, go to the Jinjo Village area of the Isle O' Hags and head for the sandy area near the lower Jinjo Houses. Grip Grab the ledge that winds around the left side of the green rocks and enter the cave there. At the end of the cave will be the final GamePak. Smash it and grab the Ice Key! Next, you will need the Mega Glowbo. Head to Gutter Gulch Mine, grab the Turbo Trainers (sneakers) near the entrance and go to the start of the river that runs through the level. Step on the switch to open the gate and follow the stream to its end (you can walk on water when you're using the Sneakers). Enter the cave and jump down to the very bottom of the cove. There is a boulder underwater marked with Kazooie's face that you can only open with the Kazooie Torpedo Move (press Z while you're underwater). If you've got it, you can bust open a tunnel leading to a giant ice door which can be unlocked with the Ice Key. Inside, you will find the famed Mega Glowbo. With the Mega Glowbo in hand, head back to Pine Grove (the Witchy World Hub) and pay a visit to Humba Wumba. She will now transform Kazooie into a green, fire-breathing dragon. Kazooie will remain in this form until you return to Humba Wumba and have her transform her back to bird form. Although Dragon Kazooie is virtually identical to standard Kazooie, she now has a handy fire breath move that you can use by pressing B.

MYSTERIOUS SIGNS
Getting confused by the mysterious signs in Jiggywiggy's Temple? All they say is "When fortune smiles, here will be written the Jiggy secrets." There is actually a hidden room in this temple with a sign that hints at how to make the signs active: "Witchyword is where fortune may smile upon you." To see this room, simply walk through the mural behind Jiggywiggy. The solution is to go to Grunty's fortune teller tent. She will eventually give you the "GetJiggy" cheat (see Codes). This unlocks the signs in Jiggywiggy's Temple that give you clues about all the Jiggy locations in the game.

CHARACTER PARADE
Once you collect all 90 of the Jiggies in Banjo-Tooie you will unlock a "Character Parade" mode for the "Cinema" options feature. Every character that appeared in Banjo-Tooie returns for an encore curtain call. If you don't have as much time as Fran but you still want to see the Character Parade, you can also use the JIGGYSCASTLIST cheat listed above.

GAMEPAKS
In a couple of really well hidden spots lie Banjo-Kazooie Game Paks. Game Paks are little creatures that bounce around gleefully, trying to keep their contents away from you. Bashing them open will reveal one of the harder to find items in the game for sure. Although there are only three of them, one of them contains the infamous Banjo-Kazooie Ice Key!

Game Pak #1
Return to Spiral Mountain when you have both the Airborne Egg Aiming and Grenade Eggs abilities mastered. Take to the air and fix your sights on the cracked screen covering the cave above the tree stumps. Blast it apart with a Grenade Egg and touch down inside the cave to find the Pink Special Egg. Heggy will hatch this egg for you, provided you ask nicely. This will unlock your Skinny Bird Bash ability. Don't ask. You gotta try it for yourself.

Game Pak #2
This Game Pak is also in Spiral Mountain although is a little less obvious. Fly over the waterfall and enter the cave from which the water flows. This leads to an area appropriately titled "Behind the Waterfall". Follow the ledge to the smaller waterfall in the rear of the cave and Grip Grab the ledge to climb up behind this second waterfall. There you will follow a tunnel that leads around to the Game Pak within the cage. The Blue Special Egg can be obtained here. Return to Heggy's Hen House to have her hatch this one for you as well. Homing Eggs are your reward.

Game Pak #3
The final Game Pak is the most important of all as it contains the Ice Key! Head to the Jinjo Village area of the Isle O' Hags and head for the sandy area near the lower Jinjo Houses. Grip Grab the ledge that winds around the left side of the green rocks and enter the cave there. At the end of the cave will be the final Game Pak. Inside, you will find the fabled Ice Key. Follow the instructions under "Dragon Kazooie" to see what you can do with it.

MULTIPLAYER JINJO
Okay, all of this talk about Heggy's Hen House has likely got you wondering what is in that egg up top. Well, once you learn the Hatch move in Terrydactyland head back to Heggy's place, Bill Drill the object on the Split-Up Pads, Split-Up ad have Kazooie Hatch it. Inside you'll find a Jinjo that can be used when playing multi-player.

DRIVE SUBMARINE ON LAND
Okay, this may be useless, but it's still kind of neat. Have Humba Wumba transform you into the Submarine in Jolly Roger's Lagoon. If you try to warp back to the Town Square, you will be told that submarines can't operate outside the water. Not true! You can take the sub manually up to the surface and drive up the slope. The underwater craft actually handles quite well on dry land. Sadly, you can't get up the stairs but you can hop into the pig pool and explore the docks at your heart's content.

The door straight ahead won't open but if you go to the room on the right hand side of it, there is a picture of Humba Wumba which you can jump through. Here is a signpost which gives you the locations of the workers who want their clothes washed but are too lazy to wash themselves. Also, in Jiggywiggy's temple, you can jump through the tapestry behind him.

EASTER EGGS

Type the following codes during gameplay to make your character do the following crazy actions.
ATOYOT - character jumps and freezes like the actors in the old Toyota commercials.
YMCA - character's hands sparkle, character does The Village People's "YMCA" dance, and leaves a sparkling trail behind as it moves through game world.

BALDURS GATE

ARMOUR PLATE EARLY IN THE GAME

At the begining, choose a class like warrior (never use the paladin). Go at the second floor of the building and open the drawer near a guy. Steel his cash. Go near the stair and a guard will be there. Kill him and you'll find plate armour and a good cap

EARN EASY XP

A very easy way to get XP, as long as your allignmnet allows this (if you are not a paladin or other lawful or good character) is find a "cloudkill" scroll. When you find one, go to Nashkel. In the tavern next to the bridge you'll find Volo. Go to the back room of the tavern and have a spellcaster cast the "cloudkill" aimed at Volo. Get out of the spell's radius so you don't get killed. Volo will die and yield 650 XP. He will ressurect and die again and again.

EASY LEVEL GAIN AND MONEY

When starting the game in the Town of Candlekeep do all the "Quests" (errands for guards, and other characters). That means anything that gives experience. Once you have done this go to the Character Screen and export your character. End the game and start a new game and import character. This allows you to start the game with the amount of experience that you had gained. Repeat until satisfied. If you started game as thief or strong warrior and thief has high enough lockpicking skills. You may bust or unlock a chest in the starting Inn on the second floor, that contains a gem that is worth 1,000 gold peices.

NEED A SHIELD

Buy some Master Potions of Thievery at the Carnival. Go to Nashkell's blacksmith. If you use two (generally gets your pick pocket skill above 100%) - you can steal a ton of Large Shield +1s (and sell them back at different merchants, or give them to your characters)

LOTS OF GOLD

To get as much gold as you want type: CLUAConsole:AddGold(" xxx"). Replace "xxx" with the amount of gold you want. Note: To get these codes to work you will need to go into the baldur.ini file and type [pc:c]pc:h][pc:e][pc:a][pc :t][pc:s]. There should be a space for it at the bottom of the program options. Remember to make a back up of your baldur.ini file before doing this. To make a backup simply right click the file copy it and paste it in the same directory, then rename, it to something like baldur.bak.

CHRONO LEGIONNAIRE (1)
Put one Chrono Legionnaire inside an Infantry Fighting Vehicle (IFV) to make a Chrono Fighting Vehicle. The Chrono Beam doesn't get any stronger, but your units won't die as easily.

CHRONO LEGIONNAIRE (2)
Chrono Legionnaires packed together can even zap an enemy building out of time, try it. Ten Legionnaires and above give the maximum effect.

LIBYAN CHEAT
Build five or six demolition trucks. Make sure you have a fully charged Iron Curtain. Send the Trucks into an enemy base, before they come in range of their weapons, cast the Iron Curtain on them. They'll be invincable until they reach their target, at which point they'll still explode even with the Curtain on.

GOOD USE OF THE V3
If you play as the soviets, one of the best way to use the V3 Rocket is to have about 3 Rhino tanks for each V3 Rocket to protect them. If you have about 5 V3 Rockets and 12 - 15 Rhino tanks you can take out a medium base! One of the reasons is that the V3 Rocket fire very long!

ALLIED ADVANTAGE
In Multiplayer or skirmish mode, use spies to infiltrate all enemy battle labs. This is to train new units like the physic commando (he can use the mind control and plant C-4 on buildings). Later, if you capture the base completely (meaning all buildings) you will get the Yuri Prime.

EXCELLENT BASE DEFENSE
Make 10-12 Yuris and place them all around your base. Put them as team1 (Ctrl + 1) then when an enemy attacks use the Yuri's 2nd attack. This should destroy most of the attacking force.

LAST ALLIED MISSION
There are many buildings. Use them to protect your base plus your Chrono Miner and repair it if it is damaged. You can get free GIs if you capture the Tech Airport up North. Garrisoned buildings work well against the Soviets as they have no form of air attack and usually forget to us their V3s.

THE ULTIMATE TANYA
Build a Chronosphere then a Tanya and IFV. Put Tanya in it and use the Chronosphere to drop the IFV in the enemies base and deploy her. Get her to demolish as many building as she can. Note: This code is for Allies only.

TRANSPORT YOUR ENTIRE ARMY
The Soviets: The armoured transport can take 10 infantry or 2 veichles. If you load an armoured transport with another 2 ATs that in turn are loaded with 2 more ATs that are loaded with another 2 ATs that are etc... then you can put your tanks and infantry in the final set that you make. Now you can transport your whole army across water! This is particually effective if there is some empty land near a river and near the enemy if you want to setup and you want to setup base there.

CAPTURE AN AIRFIELD
A good trick is to capture an air field and use the crazy ivan ot wait near the paratroopers you can have an unlimited supply of kamikazes to launch hoewver be warned the explosives are really dangerous stuff and another trick is to plant dynamite at a terror drone and make it attack either a war miner or the tanks the results will be that when the terror drone eventually does its job the affected unit will go of with a bang and explode causing damage to preferably the ore refinery also a cheaper alternative to demolition trucks are crazy ivans loaded in an IFV the blast is weaker but it still produces radiation and also a psychic field like when the yuris use their 2nd attack.

HOW TO VIEW CREDITS
Click on the Westwood logo at the title screen.

20 TANKS
Type in XPEINA518 when the game is loading and this will start you off with 20 medium tanks.

BEAT SOVIET CONVOY MISSION
The Soviet mission the one in which you must destroy an Allied convoy - can be accomplished in under a minute. At the start of the mission, pursue the convoy that is heading north with all of your units. (An armored tank division flanks the Allied convoy, so it is easy to overtake.) Next, unleash the potent firepower of your combined forces.

CONSTRUCT BASES ANYWHERE
To construct a base that isn't connected to the current one, build a silo beside an existing structure. Then contiguously erect silos until you have reached your desired construction point. Afterwards, sell the silos and build your base!

FASTER SAILING
Having certain naval vessels within the formation will increase the overall speed of the fleet. When a slower ship (such as a Cruiser) is coupled with a speedier one - like a Transport or Minelayer the entire fleet will travel at the rate of the fastest ship.

FASTER VEHICLES
Build a mine layer and put it in a team with something slow like mammoth tanks. Put the team in formation ("F"). Now the tanks will go as fast as the mine layer.

FINDING SUBS
You can find subs that are underwater by building a naval yard or sub pen and moving it around over the water. Note: This only works if you are close enough to your base to deploy the building.

FREE MEN
Build a missile silo. When the missile is ready, sell the silo and immeidately launch the missile. If you were quick enough, the sale will have stopped and some troops will come out of the silo.

LONG RANGE GRENADIERS
In multiplayer or the regular game, play as the soviets. Next, build a grenadier and have him force fire on the ground around him. Right before he throws it, click anywhere on the map and the greade will SAIL over to that point.

REPAIR VEHICLES 10 TIMES FASTER
In order to repair vehicles 10 times faster and not cost as much is you place a vehicle on a service deposit. Take the vehicle off the service deposit right after it starts repairing.Then quikly put the vehicle back on th service deposit. This will make the vehicle repair about 10 time faster and will not cost as much!. After the vehicle is finished repairing you have to quikly get the vehicle off the service deposit or you will start paying the normal price for repairing
